UPLAND TEAM CELEBRATES FOURTH THRU VICTORY

Final Inning Decides the Contest, Score 6-4

Upland and Cucamonga Wage Battle Royal Throughout the Entire Game—Contest Best of Season Thus Far.

Upland celebrated the Glorious Fourth in a perfectly safe and sane manner by boosting her average over the 500 mark in the percentage column of the Orange Belt Scramble, the same being done at Cucamonga's expense, the home squad defeating the Grape-Growers by the score of 6 to 4. The visitors presented their strongest line-up of the season and by the same token promise to make the opposition go the limit in all future games to defeat them. Rud Isaacs did the hurling for the enemy and performed in clever fashion and while being found for eleven safe blows fanned nine and offered a stubborn front to Upland's efforts. Rud's team mates staked him to a three run lead, but this advantage melted away in the third canto and Upland was never headed there after.

Willis Riggs again pitched in fine form for Our Own, this game making five won out of the last six played, for the clever heaver. His only bad inning was the first, when the opposition piled up a three-run handicap through the medium of a pass, three hits and a couple of bobbles. He then settled down to regular routine, Upland's game battle to overtake and then pass the visitors being greatly enjoyed by the largest crowd of the season, who rooted right royally for

Standing of the Clubs

	Won.	Lost.	Pct.
Ontario	9	2	.819
Etiwanda	8	3	.728
Upland	6	5	.546
O. P. Co.	6	5	.546
Cucamonga	5	7	.417
Republics	0	12	.000

Games next Saturday—Upland vs. Cucamonga. O. P. Co. vs. Ontario. Etiwanda vs. Republics.

their favorites. Batting honors for the locals were carried off by Petrow, Swan, Dahlem and Craig, they securing two safe ones apiece, the three latter players showing a two-base hit each. Roy Freeman, who made his first appearance with Noah in the Ararat league, led the opposition with the stick, getting three nice hits, Goerlitz following closely with two. The fielding features were supplied by Petrow in center, his shoe string catch of a low liner from Isaac's but eliciting hearty applause from the spectators. Carl Riggs' two catches in deep left, Dahlem's grab of W. Kinkaid's liner and Cupid Manker's stop of Freeman's grounder back of first were all incidents worthy of special mention.

Upland's efforts in the opening stanza were anything but safe and sang. Ward, first man up, got a free pass to the initial sack; George Thorpe singled infield, but Ward was caught at third, W. Riggs to Dahlem, Cherbak got a lucky hit to right; G. Thorpe advancing to third; Cherbak, the irrepressible, stole second, both men registering on Frank Thorpe's clean single to center, the latter immediately swiping second; Freeman hit to Willis Riggs, who threw low to first, F. Thorpe advancing to third; H. Kinkaid hit to Bryden, who made a neat stop, but pegged wide to the plate, Thorpe crossing with the third run; Kinkaid stole second, Riggs here decided things had gone far enough and put on the brakes, W. Kinkaid going out, Dahlem to Swan and Goerlitz flying out to left.

Upland got back two of these tallies in her half of the second. Bryden led off with a neat center and scored on Dahlem's two-masted drive to the same territory, the Flying Dutchman coming across on Bun Craig's clean punch for a base; Harms hit to Isaacs, who threw to G. Thorpe, forcing Craig; C. Riggs hit to Short, whose toss to Freeman at second forced Harms. Willis Riggs singled but Cupid Manker whiffed.

Upland tied the score at three in the third canto. Petrow opened with a single and stole second and scored on Swan's clean hit; Swan swiped second, Bryden hoisted to short; Dahlem fanned; Craig hit to F. Thorpe, who threw wild to first, but Harms ended the inning by fanning.

The locals went to the lead in the fifth. Petrow got his second safe hit and swiped second, going to third on a passed ball; Swan fanned, Bryden availed to left, Dahlem's long drive to deep left was muffed by H. Kinkaid, Petrow scoring, Craig went out, G. Thorpe to first.

The game was tied in the eighth. Bryden hit to Freeman, who swiped the handle of the pill, seems pulling up safely at first; Dahlem singled to

OPENING OF PACIFIC ELECTRIC MARKS EPOCH IN HISTORY

Once More Will President Shoup Sell Tickets

Eight Trains Each Way Daily When Pacific Electric Opens Saturday—Train Crews Receive Instructions This Week.

The Upland-San Bernardino line is complete and on Tuesday and Wednesday a three-car train with fully fifty motormen, conductors and Pacific Electric officials passed through here on an inspection and general instruction trip to the Gate City.

By Saturday everything will be in readiness for the grand opening and San Bernardino is doing itself proud in preparation.

Spike Driving Ceremonies

Immediately following the arrival of the first trains over the Pacific Electric at 10:15 the spike-driving ceremonies will open. To Col. Geo. E. Pillsbury, chief engineer, the man who built the road, will be handed the silver spike and the silver hammer, the former by Capt. V. P. Demens of Alta Loma and the latter by J. C. Jones of Etiwanda. The orange wood tie, provided by A. B. Miller of Fontana, is already in the ground. Col. Pillsbury will place the spike, and then the pioneers of a number of cities will each strike a blow. Mayor H. H. Rose will strike for Los Angeles and Mayor J. W. Catlik for San Bernardino. C. M. Grew will be the chairman at this ceremony.

The guests of honor from various cities will take the reviewing stand, and the pageant-parade will start. The Venice and other bands will be in the parade.

Indians in Pageant

There will be the Indians—real Indians in real costumes—donated by the New York Motion Picture company. The Indian nude of travel will be there.

Then will come the monks and the Spaniards, portrayed by the people of Riverside. There will be Saint Bernard and his monks Indian pupils from the missions, Spanish senoritas and gay caballeros on gaily caparisoned steeds. The ancient carreta, drawn by oxen, will be there to demonstrate the mode of travel of the monks. Next will be the float drawn by four mules carrying a score of Spanish senoritas and duennas seated in a mission chair. They will carry castanets and throw sacaroons into the crowds as they pass through the streets. Spanish caballeros mounted on steed will be the outriders. John S. McGroarty is giving his special aid to this feature of the pageant.

The pioneers of 1849, the gold seekers, will be the real pioneers, San Bernardino has scores of the hardy men and women who came over the plains in the early days, and under the leadership of John Brown they will make up the pioneer period. The old stage coach is now here. The prairie schooner, drawn by real oxen—also courtesy

PRINTER FOR TREASURER

A movement was started recently in Southern California to prevail upon State Printer Friend Wm. Richardson to become a candidate for State Treasurer, and in Los Angeles today he announced to his friends that he would make the race. His record in the state printing office has been an efficient one, as is shown in the big reductions in the cost of school books and other printing. His reform of the printing office has proved his business and executive ability.

Mr. Richardson is the proprietor of the Berkeley Daily Gazette and has for the past twelve years been the president of the California Press Association. He is well and favorably known and has the business ability necessary for the important office of State Treasurer. Before going to Berkeley he was in business in San Bernardino, the home of State Treasurer E. D. Roberts.

Mr. Richardson will seek the Progressive nomination and he has assurances from friends in other parties that they will secure for him these nominations, also, as the position of State Treasurer is non-partisan in character.

"Do you believe in home rule?" observes an exchange. Some of us—alas! have to, whether we would or not.

A girl is less concerned when she discovers that she has tripped all over town with a big hole in the heel of her stocking than when she finds that one of her ears was exposed where the hair didn't cover it.

Chicago man has sued his mother-in-law for \$50,000. It is worth something to know that there is a mother-in-law with real money.

MISSIONARY SMITH WRITES THE NEWS

An Interesting Letter Received by The News from India—Experiences of Residents.

Several months ago occurred the marriage of Mr. H. L. Smith and Miss Katie Burkholder, daughter of Mr. and Mrs. C. C. Burkholder, and following the marriage the young people went to India, where they are missionaries to the people of that country. This week The News has received the following letter from Mr. Smith, which will not only be of interest to readers who are acquainted with Mr. and Mrs. Smith, but will be found full of interesting information.

Bangalore, Barahat, P. O., June 1.

The Upland News, Upland, Cal. U. S. A.

Dear Editor: Through the kindness of one of your subscribers we enjoy the weekly privilege of scanning your pages. Our only regret is that your paper is not a large daily paper, for at the present your paper is the only bit of regular American news received by us. Lately we have been receiving a small semi-religious paper dealing with one certain phase of life and thought, but the Upland News is our only newspaper.

Since one of our number spent a number of years of her earlier life in your town, and since it was my happy privilege to spend nearly one year with my many dear friends in Upland, we felt it entirely proper to send this letter to The News, as the best way to return our "Salams" to all.

It is well that we are so near the "Ancient Hills" which form what is known as the "Roof of the World," else these days and coming months would leave on us less gentle marks of strain. Let me live in the pleasant consciousness that this message comes to you from near the sage Mt. Everest, of any you

(Continued on Page 3)

FISCHER WRITES OF HIS EASTERN TRIP

Ernest W. Fischer left last week for Chicago and he intends spending several weeks with relatives and friends throughout the East. Of his trip thus far in a letter to Principal M. E. Hill of Chaffee-Union High school, he says:

"My Dear Mr. Hill: I reached Chicago Saturday morning at 10 o'clock, and went to my brother's office. He was hardly expecting me to drop in and did not recognize me for a moment. I found mother and Charlie (my New York brother who has brought his bride home for a little visit) reading my letter, which assured them that I should be able to get away from California inside of two or three weeks.

"It has been a delightful trip and I've had no asthma, which is rather comforting.

"We had a rainstorm with much thunder and lightning last night. Two of the bolts were very close, indeed. A big elm tree was blown in two, much as the one at Chaffee.

"Today I went to visit my sister at Batavia, 15 miles west. They have a beautiful home, far more grand than any of the rest of the tribe may show. Their yard slopes down to the Fox river, and their row boat is quite a convenient thing. My small brother (Raymond, 13 years old) was with me, and we took a duck in the river.

"We returned late to spend the evening at the home of an uncle. It was better so, for I heard after I got back here that part of the show was in my honor. It's after 10, and I'm sleepy. Good night!

Thursday—I've struck a job or two and they have kept me busy. We have ten or twelve acres of hay land and are starting to get it in. It rains every day, so that hay-making progresses slowly. One rain storm blew down most of a thirty-five year old elm tree in the front yard, and Charlie and I have spent a good many hours grubbing it out. We are still grubbing and the roots get larger as we go down. I'm glad it is not a eucalyptus tree. Between times I play tennis with brother and sister.

"My Cambridge brother (Fred) can not come until August. We hoped to get together—all who live in America—next week, but it will have to wait.

Yours truly,

E. W. FISCHER."

SUPERVISORS ACT ON BUT FOUR COMPLAINTS

During the first three days of the session of the board of equalization, four complaints have been filed, which resulted in total reduction of \$1050 on land and \$700 on improvements, a total reduction of \$1750. The board continues in session today and tomorrow, but will then probably adjourn until Monday.

Pat—They should get after the trusts, Mike!
Mike—After them! And 'tis little they'll get, after the trusts have got theirs!

PROPOSED ISSUE OF BONDS EXPLAINED BY LAMBRIGGER

Chamber of Commerce Board Considers Issue

A Mass Meeting Planned by Chamber of Commerce Board of Directors to Talk Over Proposed Bond Issue With Voters.

At the city hall last Tuesday evening a special session of the board of directors of the Chamber of Commerce was held at which time C. V. Lambrigger of the city council appeared before the board to talk over the idea of a bond issue as set forth in last week's issue of The News. Mr. Lambrigger went into the 'proposition most thoroughly, stating that recently the council was endeavoring to get the city business down to a more systematic method of procedure than ever before and believed they were succeeding, and in so doing found that the general fund simply would not be sufficient to buy the necessary tools for street work and at the same time give the fire department the equipment it should have to be a credit to the city. Every phase of the proposition was gone into and discussed from many different viewpoints.

For the Street Department

For the street department City Superintendent Froehde had outlined the following as the needs of the city and the proposed work which the street committee desired to do:

Steam Roller	\$3,500.00
Scarifier	500.00
One Spike Disc Machine, approximately	300.00
Two Fresno Scrapers	80.00
One Street Sweeper (horse drawn)	500.00
One Sprinkling Wagon	800.00
Lot for oil tanks, equipment, Oil Tanks and Pumps	125.00
Fence and covering for tools, city lot	300.00
Repairing west roadway of Euclid, oiling	2,500.00
Repairing of East Roadway, Euclid avenue and oiling	2,000.00
Repairing Ninth street (city limits) oiling and screening	2,000.00
Repairing Eleventh street (scarifying)	200.00
Repairing of A street (patching)	200.00
Repairing of First avenue (scarifying)	200.00
Repairing of Third avenue (scarifying)	200.00
Repairing of Campus avenue (scarifying)	350.00
Repairing of Fourth avenue (scarifying)	50.00
Repairing of Eighth avenue (scarifying)	150.00
Total	\$14,830.00

After submitting the above to the board, Councilman Lambrigger said that he desired to impress on those present that all of this work was simply preliminary and subject to change, but in order to get at what was really needed these approximate estimates were necessary. As the total as estimated was very near the \$15,000 mark the committee, of which he was chairman, decided that that amount of money would be necessary.

For the Fire Equipment

Councilman Lambrigger stated that in arriving at what the fire department needed the committee, composed of himself, Councilmen Grier and Johnson, had depended largely on Fire Chief Manker and his assistants. A motor driven combination chemical and hose cart was among the principal items needed, while the placing of fire hydrants on lines of both the water companies as well as the installation of a fire alarm system and the purchase of more hose and other additional equipment figured up to a total of something like \$10,000.00.

And the committee believed that this was the right sum for which bonds should be issued for the fire department.

For New City Hall

Mr. Lambrigger stated that the committee had hesitated when it came to the city hall proposition, but a fire house for the fire truck was necessary, many tax payers had spoken of having a city hall which would be the design of the library, and after due consideration it had been decided to present this to the Chamber of Commerce to see what the board thought of it. Mr. Lambrigger then went into the details showing that if built the city hall would face D street, be of the design of the library and at the rear of which would be the fire station, and whether it would connect with the city hall would be a matter to be taken up later, as all of this work was only preliminary. The estimated cost of city hall and fire station is \$15,000.

After considerable discussion as to the probability of being able to sell the bonds, those of the board of directors of the Chamber of Com-

BAND CONCERT AT UPLAND TONIGHT

Band Concerts Proving a Revelation to People of the City—More Seats Provided.

If there was ever a doubt in the minds of the people of the city that Upland's band is not the best in this section, such doubt went glimmering last Thursday night when Director Wilding gave a varied program, partially in honor of the Fourth of July, and partly because he believes in giving the people variety. Each and every number at the concert was roundly applauded last Thursday evening and again tonight there is going to be a program which will be greatly enjoyed, for not only is part of it a somewhat lighter vein, but Miss Thomas, an accomplished vocalist, is to sing with the band accompanying her. Of the heavy numbers in tonight's program "Pique Dame," by Suppe, ranks foremost, and the band will render it in the usual excellent manner.

Tonight's program follows:

1. March—"His Majesty, The King"
2. Waltz—"Wedding of The Winds"
3. Vocal Solo.....Selected Miss Thomas
4. Overture—"Pique Dame".....Suppe
5. Overture—"Fantasia".....Way Down South
6. Descriptive, Fantasia.....Laurendeau
7. Song—"My Hero" (From Chocolate Soldier).....Strauss
8. Remick Hits No. 14.....Lampe
9. Containing: I'll Do It Little Bit Again; Mary, You're a Better Old Fashion; Adele; The Good Ship Mary Ann; When It's Apple Blossom Time in Normandy; What D'ye Mean, You Lost Yer Dog; Sunshine and Roses; Sailing Down the Chesapeake Bay; Rebecca of Sunny Brook Farm; All Aboard for Dixie Land.
10. Finale.....Selected

MORE NEW BOOKS AT PUBLIC LIBRARY

Books have been added to the Library since the last issue of The News, partly by purchase and partly from the old library:

Allee-for-Short, DeMorgan; The Silent Places, White; Seats of the Mighty, Parker; Crowds, Lee; Country Doctor, Balzac; Boy Scouts Series (Payson)—On the Fange, For Uncle Sam, Of the Eagle Patrol, and the Army Airship, Mountain Camp, At the Panama Canal; Sea Wolf, London; Plain Tales from the Hills, Kipling; Scalp Hunters, Reid; The Age of Elizabeth, Creighton; Uncle Remus, Harris; Rudder Grange, Stockton; Zone Policeman 88, Frank; Panama Canal, Haskin; Under the Sky in California, Saunders; Magazines Harper's, Technical World, Delicater, Christian Science Journal, Epworth Herald, Youth's Companion, July 9th, Woman's Home Companion, Daily Papers: Times, Examiner and San Bernardino News, Weekly: Upland News.

Story-telling Hour—The first "story-telling hour" will be inaugurated at the Library on Saturday afternoon at 4 o'clock. Miss Clara Williams will have charge of it. Miss Williams needs no introduction to the children of the town, as she has been very successful at this work at the grammar school the past year.

TWO DEAD IN SANTA FE WRECK AT TEMECULA

Two dead and two injured was the toll of a wreck on the Box Springs curve of the Santa Fe Temecula branch yesterday afternoon when a freight train struck a handcar manned by a section gang.

Francisco Madena was killed outright and Section Foreman Otto Munson died of his injuries at the Ramona hospital a few minutes after he was taken to that institution. His legs and hips were shattered by the collision.

Mr. Cherrup—Every cloud has a silver lining.
His Wife—Dear me! I've heard that ever since I was a little girl! Don't the styles ever change.

merce present believed that the thing to do was to call a mass meeting in the near future and talk the matter over with the people at large and see what they thought of it.

SUPERVISORS MUST APPEAR IN COURT TO SHOW CAUSE

Refusal to Grant Desert Liquor License, Cause

Lack of Thirst Emporiums On the Desert Summons Supervisors Before the Appellate Court at Los Angeles.

Al McRae has carried his desert liquor licenses to the appellate court, and Supervisors Pine, Butler, Horton, Glover and Jones were yesterday served with summons from the bench of the second district appellate court, ordering them to either grant the license sought by McRae for his Daggett saloon, or appear in court in Los Angeles July 27, to show cause why the license is not issued.

The plaintiff, who is represented by Attorney G. M. Pittman, first sets out that he filed his application for the license regularly, complying with all regulations prescribed, and after laying the foundation he continues by alleging:

"That said application for a license to carry on the business of a retail liquor establishment showed that at the last general election at which the question of granting retail and wholesale liquor licenses was submitted to the vote of the people of said Daggett precinct, and at such last general election at which the question of granting retail and wholesale license was submitted to the vote of the people in said precinct and county a majority of the votes cast upon the question in the voting precinct in which the business was to be carried on was in favor of the granting of said retail license.

"That said board did then proceed to hear testimony offered in support of said application for said license, and that no evidence whatever was offered against such application for said license.

Application Rejected

"That, on the 22nd day of June, 1914, at the time of the hearing of said application, said board of supervisors rejected said application for license to carry on the business of a retail liquor establishment and still refuse to grant said application for said license.

"That in making said rejection said refusing to grant said application, the said board of supervisors took no exception whatever to said application, either as regards its form, substance or sufficiency in any respect, and that said board of supervisors took no exception to the personal character or standing in the community of said plaintiff, but on the contrary the members of said board found no fault with said plaintiff regarding his respective character or standing in the community.

"After adding the allegation that the action was 'purely arbitrary,' the plaintiff sets up that he has no other speedy remedy, and asks the appellate court to act.

The supervisors will be represented in the hearing by District Attorney Goodell, who in the superior court succeeded in defending the action of the board in a similar instance under the same ordinance. Attorneys differ widely as to the merits of the controversy, but the action in carrying the case to the appellate court is likely to determine once for all whether under the present regulations the supervisors have the authority to make the desert dry, when many of the precincts and the districts as a whole had voted wet.

COOMBS A CANDIDATE

W. B. Coombs, former secretary of the Republican County Central Committee, has announced himself as a candidate for the nomination of Assemblyman from the Fifty-seventh district.

Mr. Coombs arrived in San Bernardino in September, 1887, to take a position in the office of the purchasing and material department of the Santa Fe railway, which was starting to construct its branch lines in Southern California. Originally from Massachusetts, for nearly twenty-seven years he has made the city of San Bernardino his home. He has followed various pursuits, has a wide acquaintance with people in every section of this great county, and if elected will use his best endeavors for the best interests of San Bernardino county. He believes that every citizen should take an interest in public affairs and should at least cast his vote understandingly of a patriotic right.

Mr. Coombs accompanied Assemblyman Bennick of Ontario to Sacramento in 1911, was appointed to the difficult position of history clerk of the 1911 legislature, and had the distinction of a newspaper write-up stating: "Mr. Coombs won the reputation at Sacramento of being the best history clerk the legislature ever had."

(Continued on Page 8)

FREDERICKS SPEAKS TO VOTERS OF SAN BERNARDINO CO.

Johnson Outclasses S. P. As Machine Builder

Captain Fredericks Southern California's Candidate for Governor, Talks to Upland Voters on Present Day Issues.

Captain John D. Fredericks, Southern California's candidate for Governor, was in Upland Monday, and from beneath the pepper trees near the Commercial National Bank he addressed Upland citizens on the issues of the present campaign. Captain Fredericks and his party, which included Mrs. Fredericks, were met at Ontario by several Upland men and escorted to this city, and after a short address the party wended its way to San Bernardino, making several stops en route. At San Bernardino a complimentary dinner to Mr. Fredericks was given at the Steward, after which the candidate for governor addressed a large assemblage in the opera house in spite of the warm evening.

He spoke in part as follows:

"I want to talk to you as a lawyer to a jury. It is a pleasure to me to do this as it was in San Bernardino county that I had my first big case as an attorney. You will remember when a certain contractor had a patent on the right to the use of oil in laying the dust on the roads. This gave him a monopoly. The people of Redlands did not believe it just, and I was retained to contest the claim for them. I did it and won.

"I never got a cent of money out of that case except my expenses, but I got paid a great deal for it later—several years, in fact. Today I met the man whom we beat, over at Etiwanda.

"We recognized each other and stopped and talked. He told me he lost a case and \$10,000.00—that would have been his, but he made the mistake of not having me for his lawyer. And that man told me he intended to vote for me, as he believes I would make a good governor.

Case of False Pretenses

"Now, the progressive cause as set forth by Governor Johnson is a case of false pretenses. I am experienced in this line and I'll not permit the stealth of the policies of Abraham Lincoln.

"Johnson said: 'Will you go on with me, or will you go backward?' I want to tell him, we'll do neither, we'll go on, but go on without him. It's our heritage, and we stick by it, Governor Johnson, but not with you.

"The present governor was elected as a Republican. We put him there to keep the Southern Pacific out of office, as he said he'd do. We gave him an overwhelming vote. The next time the people spoke on the subject of Johnson was two years later, when he ran on the ticket with one of the most popular names in American history, and we gave him a majority of just 174 votes. Two years before he had 22,000.

"For sixteen years Southern California has had no representative in the administrative office of this great state. I want Southern California to have the governor of California. I didn't ask to be that man, but now it seems my duty to get into the fray.

"Southern California has thirty-eight per cent of the Republican vote in the state and one-third of the assessed valuation. My name is the only one on the ticket from south of the Tehachapi and it would do you good, as I feel it would do you good, to know Southern California stands by its neighbors."

Captain Fredericks delivered a eulogy on Lincoln and traced the history of the Republican party as the history of the nation's progress and prosperity.

"The Progressive party has given the country no Lincolnism," he said, "but it throws soap, and we have no soap to throw."

"The Republican party is the essence of progress.

"Who gave us the laws on insurance, banking, domestic relations, child labor and those other models of progress our friends are claiming?"

Republican Party Responsible

"The Republican party is responsible for all of these, but the Progressives are claiming them by their false pretense. We earned it by virtue, and they can't have it.

"What is progress—it comes about by honest living, by clean living, that which begets a clear brain and sound body—good food and proper exercise. There is no law for this. Give me the child and I'll get more progress."

THURSDAY, JULY 9, 1914

WITHIN a few days a mass meeting will be called at which the people of the city will be asked to discuss a proposed bond issue for \$40,000, the money to be used for additional fire equipment, a street building and repair plant and care of streets, and for the erection of a city hall. Recently Mayor Woodbridge, who has been giving a large amount of his time toward getting city business on a more systematic basis, found through the work of the committees of the council, that the general fund of the city is not sufficient at this time to carry on the street work desired, nor to improve the fire department to where it will be enabled to cope with any blaze no matter in what part of the city. Upland has gone steadily to the front and with that progress expense has necessarily increased in order to maintain the high standard of cleanliness which the people of this city desire. Councilman Lambrigger was named as chairman of a committee to look into ways and means by which the city might go ahead with its work to the best advantage, and after several weeks of study, a bond issue proved to be the only avenue by which this could be done. The cost to the taxpayer of the proposed bond issue is the main factor to be considered; the improvement of the fire department is nothing more nor less than a sensible business-like transaction, for if your house is destroyed by fire because the department was unable to get there in time to save it, right there you have spent more money than it would have cost you for the bond issue.

Upland today has some excellent streets, and if you don't believe it, visit a few towns about us, then you'll come back and a hose cart weighing almost as much, then run a mile or council finds that they cannot purchase the new street equipment needed, and keep up the repair work out of the general fund, it is simply a wise business move to vote the street bonds.

The new city hall we can get along without. City business could not doubt be transacted in the old residence for several years, but do the people of the city want it transacted there. The Upland News could do without its linotype, without its power-driven presses, and go back to the hand methods—but not for us. We travel this way but once, and if we do not get right, let us not go. Thus with the city. We have a certain civic pride. Not a property owner cares to reside in a city that appears as though one heel were worn off on the side. On the city property we have one excellent building in the Carnegie Library, and now let us build the City Hall along with these other proposed improvements.

The cost of this entire issue of \$40,000 is \$1.71 the first year on each \$1,000 in valuation, and that is figured on a city valuation of \$1,750,000.00, forty-year bonds at 6 per cent interest. The interest will very likely be less, thus reducing the cost. The following years the cost reduces, and if you take your lead pencil and figure for a moment you can tell just what it will cost you to live in a town with a modern fire fighting equipment, an up-to-date street working and repairing plant, as well as a city hall in which we can take some pride. We are traveling the road of life just once—let us in our city life so invest our money to get the biggest returns, and this issue is one which appeals to us as a plain, horse sense proposition.

IN THE next few weeks The News is going to print the ideas of citizens on the proposed bond issue of \$40,000 for streets, fire department and city hall, and this week we give some enlightenment on the subject of the fire department as seen by a member of that organization. In another column of this issue will be found the proposition of the issue of \$40,000 set forth in detail as it has been worked out by the committee appointed by Mayor Woodbridge from the city council with Councilman Lambrigger acting as chairman. If you are in favor of the bond issue, or if you are against the proposition, The News will be glad to present your arguments and reasons therefor. Copy should be typewritten, if possible, and your name signed to the article. Of the proposed issue to improve the fire department equipment our correspondent states as follows:

The development of fire fighting as a science has hinged, and still hinges, upon time. The great aim is time saving. When we look back two hundred years or more upon the old days in which the volunteer fire brigades of our forefathers did its service as efficiently as possible under old conditions, and the machines, if they could be termed such, were hauled over the road by our same fleet-footed and stalwart forefathers, who worked merely for glory and a red shirt, then take a casual glance at our modern equipment—a casual glance is all that is necessary—and we are obliged to simply confess that our modern equipment in the City of Upland today is practically the same as that used in the old days by our forefathers.

When an alarm is sounded, the volunteer fire brigade of today, of the same stern stuff as our forefathers, find it necessary to "hitch" themselves to a chemical weighing eleven hundred pounds and a hose cart weighing almost as much, then run a mile or two, as the case may be, and arrive at the fire breathless and utterly unfit to fight the fire which they have been called upon to extinguish.

Too much cannot be said for motor equipment, and even this is subject to constant improvement. It is greatly to the credit of modern engineering that as towns grow into cities, man-power is replaced by horsepower and now horsepower is being replaced by motorpower.

This is a great saving in time in many ways. The motor does not get winded and have to stop for rest. It does not fall and break its legs, and consequently have to be shot. The motor is never tired; feed it a little gasoline and oil and it will work all day without being stalled, fed again and groomed. Then, too, the advance of mechanical agencies in the fire department means better trained men, who know what to do and when to do it, by instinct.

A motor driven fire truck takes the fire brigade to the fire in the shortest possible time, saves up the energy that would otherwise be missed in hauling the fire apparatus to the fire, so that when the firemen arrive they are able to start right in with a vim and vengeance and put the fire out before it has gained much headway.

Mr. Taxpayer—Proper fire equipment means lower insurance rates, better fire protection and a more proficient fire department. Will you spend one dollar to save five dollars? Think it over.

AMERICAN FRUIT IN FOREIGN BASKETS

Mayor T. R. Woodbridge has called our attention to the following article taken from the "Current Opinion," and readers will find in it some excellent points of interest.

One of the principal reasons why American fruit is not filling the baskets of the European consumer is because a box of California oranges or lemons, or a barrel of Oregon apples, has to be handled and re-handled seven times in transportation. From the fruit orchards of the Pacific Coast to the markets of Europe there is a stretch of 6000 miles. A writer in The Annalist, who points out these deterrents to our foreign fruit trade, anticipates a tremendous boom in this trade with the opening of the Panama canal. California's fruit ships, he claims, will run from port to port with unbroken cargoes. Rehandling will be practically eliminated. Our fruit will arrive in London or Paris in better condition than that which comes from Spain or Italy, or Northern Africa, Europe's present chief sources of supply.

"We have been preparing this market for some years by teaching Europeans the excellence of our fruit. It has been rather high in price, but it has sold readily because of its superior quality. Shipping all the way by water with a minimum of handling will reduce the percentage of decayed fruit. This and the lessened cost of transportation will cut the price, and our fruits will be not only better, but cheaper than any on the foreign markets today. The growers of the Pacific Coast are all striving to enlarge the yields of their groves and orchards. The foreign markets will give them the bigger outlet for their crops that they need. It is predicted that our fruits will soon become an important item in our export balance sheet."

A Great Future for American Fruit

The California lemon, we learn, is steadily pushing the Sicilian fruit off the American market. The opening of the Canal will eventually kill the New York market for Sicilian lemons. "Not only that, but the American lemon will compete with the Sicilian even in the Italian markets, when the shipments can be made all the way by water." Methods of handling oranges have been brought to a high stage of efficiency in the California groves during recent years. Decay in transit has been reduced materially. Much of the improvement in the handling of the citrusous fruit is due to the careful studies of experts of the United States Government. Only the difficulties of transportation, we are informed, have kept American fruits from conquering European markets.

"It is this incessant care that has made the American orange famous wherever it has been introduced. In England the only complaint has been that the supply was insufficient. There has been no objection to the rather high price—9 to 12 cents each for the California seedless or navel orange.

"The apple growers of the Pacific Northwest are quite as careful with their product as the orange and lemon producers of Southern California. It is this capacity for taking infinite pains that has put American fruit where it is on the foreign markets, and it is this same patience and thoroughness that will place it beyond competition abroad when the long overland journey and the consequent rehandling are eliminated."

One Hundred Million Pounds of Prunes

Fruit-growing is rapidly becoming one of the most important national industries. Our total fruit exports, says the writer in The Annalist, came to nearly \$23,000,000 in 1913. Our export lemon trade has grown from practically nothing to \$400,000 in two years. The average export of apples amounts to \$11,417,000 per

annum; oranges, \$3,300,000; or prunes—"that great staple dainty of the unwealthy"—we are now exporting not far from 100,000,000 pounds a year, an item of more than \$5,500,000 annually. If the significance of these figures is grasped, the writer points out, it can easily be understood what a tremendous benefit the opening of the Canal will prove to the fruit industry of the Pacific Coast. The great distance to Europe, he says, is no deterrent to commerce, even in perishable products, if the excessive number of transshipments is eliminated.

"With the narrowing of the cattle ranges and the scant widening of the grain acreage, America is becoming more and more dependent on its fruit supply. Twenty years ago a failure of the fruit crops would not have been really serious; today it would be a calamity."

"Fruit makes up the largest single item of transcontinental tonnage. With the opening of the Panama Canal undoubtedly a large proportion of these overland shipments will be diverted to the all-water route, but how much is as yet impossible to conjecture. This change in the paths of transportation will not affect Florida to any great extent. Florida ranks next to California in the production of oranges and lemons, and finds a ready market in the country along the Northern Atlantic seaboard and as far west as the Mississippi. In the latter region Florida and California compete on almost an equal footing."

SAFETY ON ROADS AIM OF STATE'S ENGINEERS

Safety for the highway traveler is one of the dominant factors in the construction of the California state highway that is receiving more than passing attention by the highway commission, according to an announcement in its bulletin. Just issued.

Six separate important safety-shases have been outlined by highway engineers, it states, which it is prophesied will save scores of lives and limbs in coming years and will serve to bring thousands of tourists into California from the East during the 1915 exposition and later. They are:

1. Elimination of grade crossings wherever traffic bids well to be heavy on the highway when completed. Also to make view clear both ways.

2. Co-operation with Southern Pacific in eliminating grade crossings where heavy fogs are a menace to the sight of travelers.

3. Elimination of grade crossings near tunnels in mountains. Thirty-four have been eliminated in Sacramento canyon division already.

4. Curves all over the state made wide to avoid possible collision. Supervisors, chambers of commerce and other officials have co-operated in this.

5. Widening of mountain roads and reducing of steep grades to an average of 6 per cent so that the most timid woman will not be afraid to attempt them.

6. Careful construction of bridges in low flood districts, making them as permanent as is possible in addition to making other efforts to avoid flood damage.

"From the very beginning," the bulletin states, "the aim has been to make the state highway safe, sane and economical."

Secretary W. J. Bryan scored a bunch of American exploiters who denounced Bryan and the army officers, saying the latter were cowards because Uncle Sam didn't intervene. Bryan said to them: "You men went to Mexico because you were not satisfied with conditions at home and you went there to get rich quick; and now you want the whole country to raise an army of 500,000 men and send it to Mexico at this country's expense to protect you and you won't spend a cent to support it there." Hurrah for Billy Bryan, once more!—Fairmont Sentinel.

Lasher—We're going to have some amateur theatricals at my house next week and a big supper afterward. Can you be there?

Dasher—Oh, I'll be there, old man, but—er—I may be late.

A CLEAN-UP DECALOGUE

Remember that fly which you saw the first warm day in April—the one you were careless enough not to swat? Well, it laid 120 eggs, which hatched into maggots on May 1st. Half of these were female, and on May 25th, having become adult flies, they laid a total of 7200 eggs. Thirty-six hundred females resulted, and on June 19th they laid 432,000 eggs. These will hatch July 1st, half of them will be females, and on July 14th, if they all survive, they will lay 25,920,000 eggs. Of course, somebody who has taken for its real worth the preaching against the fly may have broken up many of these family circles, but there is every reason why you should enter the lists now. Just remember that a fly comes from filth, loves filth, rears his family in it, and brings it to your table—and that a bacterium so small as to hide by regiments on a fly's foot is yet big enough to cause the undertaker to turn in at your door. Then swat and burn and starve and otherwise destroy. And while you are about it, remember that a little oil on the hatching waters of the mosquito is a present help that will prevent much future trouble.

Clean-up campaigns are the order of the day. A stay-clean spirit, once it got abroad in the land, would be productive of much better results. In this connection a "Clean-up Decalogue," issued by the Board of Trade of Hoboken, New Jersey, is interesting. In addition, it is worthy of the widest possible publicity; we cheerfully give its "commandments" room:

Remember thy garbage-can to keep it covered.

Thou shalt cut the weeds in thy vacant lot lest it become a hiding place for old tin cans.

Thou shalt bear witness against thy neighbor's rubbish heap.

Thou shalt clean out the habitation of thy horse.

Thou shalt prevent the breeding of the fly, that thy children unto the third and fourth generation need not swat him.

Remember thy back yard and alley to keep them clean. Six days shalt thou labor. If yet the task is not accomplished thou couldst do worse than continue on the seventh.

Thou shalt covet the air and sun-shine.

Look not upon the milk when it cometh from an unclean dairy.

Remember thy cleaning-up day and keep it holy.

If thou dost harken unto these sayings to do them thou shalt live long in the land, and the "clean-up" spirit shalt last 365 days in the year.

TO RUSH BUILDING OF NEW LINE TO EL SEGUNDO

An agreement was signed a few days ago between the Pacific Electric Railway company and the El Segundo Land and Improvement company whereby the railway company obligates itself to complete the line from Hawthorne to El Segundo and have it in running order not later than Aug. 2. The railway company also agrees to build a station or depot at El Segundo within 30 days, which insures the completion of the depot by the time the line is in operation.

This will be welcome news to the people of El Segundo, as they have had a long wait for the new line, which has been delayed from time to time for one reason or another. It is expected that this will result in a large increase of sales of El Segundo property. Many reservations have been made during the last few months contingent upon the completion of the car line, it is stated.

Series of Excursions
As soon as the new car line is in operation the El Segundo Land and Improvement company will run a series of semi-weekly excursions to the industrial city direct from Los Angeles.

The new line will ply between El Segundo and Hawthorne, and at the latter place a change will be made to the Hawthorne line of the Los Angeles Railway company. It is understood, however, that as soon as traffic conditions warrant, the Pacific Electric will build its proposed line between Hawthorne and Watts, connecting with the four-track system at that point, which will give direct and through service between Los Angeles and El Segundo.

HOUSEHOLD HINTS

Cleanses White Shoes

When cleaners had failed to get my white kid shoes clean, I took a piece of sandpaper and rubbed out the grass stains. Then I made a good soapuds and took a small brush and scrubbed them well, being careful to cover all surfaces, and placed in the sun to dry. The result is a new pair of shoes.

Superior Lemon Pie

Juice and grated rind of one large lemon, one cupful of sugar, yolks of four eggs; stir all together and cook in double boiler to the consistency of jelly. Beat two of the whites in one dish and two in another dish. When lemon, yolks and sugar are cooked

fold in two of the beaten whites. Have pie crust baked and fill with the above mixture. Then beat two teaspoonful of sugar in the remaining beaten whites and spread roughly over pie. Place in oven and brown lightly. Make crust same as any pie.

This Lubricates

What is more troublesome than a window or drawer hard to move? Simply get a piece of paraffine and rub the edges, work back and forth a time or two and you will have no more difficulty.

An Ironing Hint

Ironing is even more a strain upon the feet than on the hands. I have found considerable relief by standing on a thick pad made of old garments or an old jute seed together. It is even softer than carpet.—W. W.

Society

Circle Girls Entertain—

The Circle Girls of the Menonite church were pleasantly entertained at the home of G. G. Isaac on East Ninth street Wednesday evening. About thirty-two were present and a short business session was held. The president, Miss Detweiler, resigned on account of ill health, and Miss Hulda Kuehney was elected president. The rest of the evening was passed with fancy work and later delightful cool refreshments were served.

Nicholson-Hawthorne—

One of the most attractive affairs of the season was the wedding of Miss Blanche Hawthorne and Mr. Carl Nicholson, held at the home of the bride's parents, Mr. and Mrs. J. W. Hawthorne, West Eighth street, July 1, 1914, at high noon. At the first stroke of Lohengrin's Bridal March, rendered by Miss Hazel Wright, the bride and groom marched under the arch of pepper berries and white daisies, attended by Miss Blanche Wright, bridesmaid, and Mr. Carl Hawthorne, best man. Rev. S. S. Sampson officiated.

The bride was beautifully attired in white silk crepe de chene, trimmed with shadow lace, with a wreath of orange blossoms in her hair, and carrying a large bouquet of white carnations.

After the ceremony, the guests all sat down to a very bountiful and tastefully prepared three-course dinner, served by the mother of the bride, Mrs. J. W. Hawthorne, after which the bride and groom were showered with rice and old shoes and many beautiful presents.

The young couple left by machine with Mr. and Mrs. James Hawthorne for Los Angeles and later to the beaches and Catalina Islands, where they are spending their honeymoon.

Those present outside of the family were Mr. and Mrs. James Hawthorne, Corona, Cal.; Mrs. McLaughlin, Long Beach, Cal.; Mr. and Mrs. S. G. McClelland, Mrs. John Long and three children, Mr. John Wier, Mr. and Mrs. Rosenberger, Misses Blanche and Hazel Wright.

Trip to Old Baldy—

The Sunday school pupils of Miss Laura G. Rice and Miss Mary Tweed will take a mountain hike, leaving this morning for Old Baldy. The party of boys will be accompanied by Miss Rice, Miss Margaret West, who is the house guest of Miss Rice, and Rev. R. C. Stone. A jolly time is anticipated by the boys who belong to the classes.

Gives Dinner to Friends—

Mrs. M. J. Roberts invited friends to enjoy a good chicken dinner with her Wednesday, and a warm July day was most delightfully spent at her home on East Ninth street. The chief occupation of the afternoon was to keep cool and the exchange of pleasant conversation. Mr. and Mrs. S. E. Spicer, Mrs. Charles Roberts and daughter Myra were the guests who enjoyed the hospitality of Mrs. Roberts.

Entertain at Dinner—

Mr. and Mrs. Bert Spicer pleasantly entertained friends the Fourth. Their place presented a very pretty scene, being decorated with flags and bunting under the large shade trees, where a table laden with good things to eat tempted the appetites until the noon meal. Mr. and Mrs. Spicer are building a new home and expect to be able to occupy it by the first of the month. Those to enjoy this occasion were Mr. and Mrs. A. L. Palis and family, Mr. and Mrs. N. L. Hamer and family, Mr. and Mrs. Maurer and Mrs. Hare.

Merry Wives Embroidery Club—

The Merry Wives will be entertained by Mrs. C. M. Sikes on Friday afternoon of this week.

Weinie Bake—

One of the jolliest outings of the season was much enjoyed Tuesday evening when the intermediate class of boys entertained the intermediate class of girls with a "weenie bake" at the home of O. V. Rice on Nineteenth street. Miss Laura Rice, Mrs. Nisbet and Mrs. Derwin are the teachers of the class and helped to carry out the plans for the evening. Rev. Stone and about forty were present. A big bon fire, roasting of ten pounds of weenies, lemonade, oranges and rolls were much enjoyed. Rev. Stone started Thursday morning with the boys for a two days' trip to the top of Old Baldy.

Mrs. Nichols, Hostess—

The B. B. Club was delightfully entertained Wednesday afternoon at the home of Mrs. Bertrand Nichols. Although the weather was very warm, a good jolly crowd came with their fancy work. Delicious cool refreshments were served to the following: Mrs. James Paulin, Mrs. Jonas Frownfelter, Mrs. Percy Plagge, Mrs. Clifford Cochran, Mrs. Glen Atwood, Misses Mabel Nichols, Eva Brown, Sylvia Koster and Iva Goodban.

Ladies' Aid—

The Ladies' Aid of the Presbyterian church held the last meeting of the year at the church Tuesday afternoon. The summer vacation lasts until October.

Dine at Hotel Virginia—

Mr. and Mrs. C. E. Grier chaperoned several members of Upland's society set last week when a trip was made to Long Beach to spend the Fourth of July, as well as the following day. All the various attractions of the famous seaside resort were taken in by the party and on the evening of the Fourth they dined at Hotel Virginia. Those making up the party were Miss Mildred Ware, Miss Eva Gerry, Miss Ismay Chadwick, Miss Hazel St. Amant, Messrs. Harold Moore, Phillip Damon, C. G. Ware, Ralph Ware and Mr. and Mrs. Grier.

Picnic at Huntington Beach—

A jolly good time took place on the camp grounds under the big shade trees at Huntington Beach on Saturday at 12 o'clock, when several friends gathered to celebrate. A sumptuous spread was well partaken of, the menu was lengthy and to the queen's taste. After remaining in silence for a short time, various games were played. The picnic party were Mr. and Mrs. Henry Ashmun, Mrs. D. E. Dobbins and children, Hugh and Ruth, Mrs. A. H. Maxwell and daughters, Bernice and Louise, Mr. and Mrs. Charles Allen and sons, Avery, Almon and Eugene of Upland; Mrs. A. M. Palmer and children, Muriel and Ainslie of Chino; Mrs. Mark B. Shaw and daughters, Muriel and Emily of San Bernardino; Rev. and Mrs. W. L. Miller and sons Glenn and Eugene of Huntington Beach.

Birthday Surprise—

On Thursday last Mrs. Berry was invited to the Atwood home and not until she had arrived and met many friends did she realize that a pleasant birthday surprise was what had happened. The hostess served a bountiful luncheon and the time was much enjoyed by all. This did not end the surprises for Mrs. Berry that evening when she went to leave home to attend the band concert she was confronted at the door by Iowa friends. It took a few minutes for Mrs. Berry to recover from another shock, but presently her speech came and she invited the friends in and soon learned that her husband had planned this surprise for the evening, which was successfully carried out and thoroughly enjoyed.

AT THE LYRIC

The New York Zoological Park, one of the finest collections of captive animals in the world, has been invaded by the motion picture men. Motion photos have been taken of the more interesting of the thousands of wild animals there, making a reel of most interesting and instructive subject matter, which is to be shown at the Lyric theater on Friday and Saturday evenings. This is undoubtedly the finest and most complete picture of captive wild beasts ever shown, and will surely be greatly enjoyed by those who see it. Besides this extraordinary feature, the Lyric also offers, on the same program a splendid two reel drama entitled "A Romance of the Everglades," taken in the Everglades and around the magnificent tourist hotels of Florida. Also two clever, fast moving farces, both chuck full of laughs. Friday and Saturday look like good nights for Lyric patrons.

If Mr. Lassen could only be corralled and would act half way decent under a tent, what a side-show attraction it would make at the exposition next year!

Those unposted persons who consider that Yuma is the hottest spot on the American continent would do well to study the Nebraska political situation a while.

HOLLYWOOD WOMEN GETS GIFT FOR CLUB

Members of the Hollywood Women's club, disbanded for the summer, are eagerly watching the rapid construction of their new clubhouse and impatiently waiting for the opening of the fall season. Gifts include the entire furnishing and decorating of one room by J. B. Hottzaw, watersprinkling system by J. A. Tuthill, two Japanese dwarf trees for the interior by Mrs. Geo. Matsumoto. The Evergreen nursery contributed shrubs and trees. Five pieces of woodwork, made in the school sloyd shops, were presented by the Selma avenue school. Hollywood high school presented a handsome piece of furniture. A large Indian basket of brown and white was made and donated by Miss Armstrong.

The new building is to be erected at a cost of \$10,000.

PIONEER STAGE TO WELCOME TRAIN

A pioneer stage coach, which half a century ago was driven by Alex Brazzelton, once famous frontiersman of California, over the very route which the Pacific Electric's new Los Angeles-San Bernardino line is now built, will welcome the first electric train to reach this city from the west on July 11.

It will be the meeting of the ancient and the new modes of transportation, and it will be a novel feature of the celebration of the people of the cities on the new line of the starting of electric traffic to connect the electric lines of San Bernardino Valley and Riverside with the rest of Southern California.

The pioneers of San Bernardino who crossed the desert and plains in 1849 and the early fifties, will reproduce the mode of travel of the pioneer days. Going back even before the days of the Americans in San Bernardino, the carreta, the old Spanish two-wheel cart drawn by oxen, and the Indian vehicle, sticks dragging behind a horse, will also be reproduced.

The celebration at San Bernardino will open in the morning of July 11 and continue in the evening.

HUBBARD'S ADVICE

If you work for a man, in Heaven's name work for him. If he pays you wages that supply bread and butter, work for him; speak well of him; stand by him and stand by the institution he represents. If you must vilify, condemn and eternally disparage, why, resign your position, and when you are outside, damn to your heart's content. But as long as you are a part of the institution, do not condemn it. If you do, you are lessening the tendrils that hold you to the institution, and the first high wind that comes along, you will be uprooted and blown away in the blizzard of track, and probably you will never know why.—Elbert Hubbard.

Vacationing

You spend an awful lot of time in dreaming of the day you'll pack your trunk and "little grip" and hie yourself away. And when the season rolls around you spend a lot of dough for railroad fare and Pullman berth, and then away you go. You land in some selected spot and stay a week or more, and live on grub that's awful punk and then put up a roar. The beds are harder than the dice; you cannot sleep at night; the way the "skeeters" slip your gore—well, pard, it's just a fright! The water knocks your tummy out; you're colicky and sick, and all you feel you want to do is lie around and kick. (The skin peels off your nose and face, the freckles freely show; you feel that you are in disgrace where'er you chance to go. You hanker for the barber man where you can get a shave, and for a bath tub and some soap—good Lord, how you rave! The blisters grow upon your feet, and every single morn sees bunions growing strong and fresh, or else a brand-new corn. There are no pretty maidens there with whom you'd like to flirt, and even all the homely ones taboo the slitted skirt. You stand it for a few brief days, and then you pull your freight, and start where beds and grub and girls are all more up-to-date. And when you hit the old home town and your own little shack, you breathe a heartfelt prayer and sigh: "Thank God, I've gotten back!"

Where the "Bull" Flourishes

Apropos of his travel talk on "London," E. M. Newman, the traveler and lecturer tells the following story: "In the House of Commons no incident is greeted with heartier laughter than that of a member who, after an eloquent oration plumps down on his silk hat on the bench behind him. A young member who had just made his maiden speech sat upon his new silk hat. There were roars of laughter. An Irish member arose and gravely said: "Mr. Speaker, permit me to congratulate the honorable gentleman upon the happy circumstance that when he sat on his hat his head was not in it." "This remark upset the dignity of the house and the speaker called 'Order! Order!'"

This Speedy Age

"What time will this train reach Perkins Junction?" asked a traveler on a short-line railroad in Missouri. "There ain't no telling," said the conductor affably. "Me and the engineer are goin' ter get off down the road apiece and hunt rabbits for a spell."—Baltimore Sun.

"Nother Slice, Please"

Our worries and our cares have fled. No longer do they hover near. Here's why glad happiness is spread. The watermelon season's here.

FRANCIS J. HENEY.

Candidate for United States Senator, who will speak in Upland, Wednesday, July 15th.

GLAD-HANDERS WILL COMPLETE RAILROAD

The last spike in the Pacific Electric's Los Angeles-San Bernardino line connecting the interior with the coast by trolley, will be driven at San Bernardino, Saturday, July 11, and all of Southern California is invited to participate in the celebration.

The cities and towns all along the new line will join in the observance of the start of electric traffic.

San Bernardino is to be the scene of a giant "get-together" gathering. Representatives of every point interested in the building of the new line will make brief addresses, at the formal ceremonies.

The Venice band, the San Bernardino band, and other musical organizations will figure in the program. In the afternoon a program of fun will be arranged at Upland springs. The city will be decorated and at night lighted. An elaborate fireworks display will be staged in the heavens in the evening.

The commercial advantages of the new railroad will affect a great interior region, for the electric line connects San Bernardino, Riverside, Redlands, Highlands, Colton, Rialto, Etiwanda, Cucamonga, the San Bernardino mountains, with the rest of Southern California, already reached by the Pacific Electric.

Upland's Shoe Bargain Center

No Job Too Large

None Too Small for

The News Print Shop

It has taken several years and a large investment in machinery for The News management to be able to make the statement that there is not a job of printing too large nor too small to be successfully produced in THE NEWS PRINT SHOP.

DURING the past year a Two-Revolution Optimum Press, also a new 12x18 Chandler & Price Job Printing Press, have been installed, in order that buyers of printing might find in this city a plant which can produce not only the regular run of commercial printing, but also the best in high-class half-tone and color work.

We are here to prove to you the above statements, and to stand behind every piece of Job Printing produced in this shop. If it isn't right, or you are not perfectly satisfied with it, let us know and it will be made satisfactory.

ABE LINCOLN SAID:

LOCAL NEWS

Mr. and Mrs. W. H. Bohland and son Eldon of Lindsay are renewing acquaintances in Upland. They will be the guests of F. H. Manker and family Thursday night.

Mr. and Mrs. Jas. Paulin are moving their household goods to Upland this week and will make their home for the present at the Franklin house on First avenue, the Franklins having moved into the Burt house on Second avenue.

Mr. Fletcher Ware enjoyed a very pleasant visit at Ocean Park Sunday with members of the Signa Nu, a fraternity order of which he is a member.

Miss Esther Winn has returned from a pleasant visit of a week passed with friends at Pasadena.

L. N. Kirk, F. J. Mehl and James Goodban returned to their work Monday morning after a pleasant outing of several days passed at Cucamonga canyon. They report the canyon entirely changed by the heavy rains of last year. They went over the falls and came out by way of West Fork. This meant some vigorous work on the part of the men though they felt well repaid for living in the outdoor quiet of the forest.

J. C. Mehl was a business visitor in Los Angeles Wednesday.

Mr. and Mrs. H. H. Reimer spent Saturday and Sunday at Long Beach visiting with Mrs. E. G. Ewy, who at one time conducted a bakery here and is now manufacturing German noodles and is meeting with success at Long Beach.

H. D. Clark's standing jumped from fourth to eleventh in the Saturday Post race for a trip East to the Championship ball game. Every sale helps that much. Your aid is solicited.

Mrs. Ruth, Mrs. Hallett and Miss Leah Schwan of Los Angeles enjoyed a week-end visit at the Eymann home. The two former ladies returned to their home the first of the week, while Miss Schwan remained and Miss Ada Schwan of Pomona will be guests this week-end.

Customers who have been buying at Haury's these ten years know that their special sales are genuine. Come and be convinced.

For choice roasts and cuts of meat Saturday go to Zweigart's Cash Market.

Mr. and Mrs. G. E. Adams enjoyed a two-days' visit at Venice Saturday and Sunday. Mrs. Adams remaining over for a week's visit.

Mr. J. W. Durig and Henry Durig and Miss E. Durig enjoyed the Fourth at Long Beach. Miss Durig remaining over Sunday and visiting with friends in Los Angeles.

Mr. and Mrs. Roy Creighton and Mrs. Kustel and son Victor passed a pleasant day at Cucamonga canyon Saturday.

Cracker Jack window—Churchill's.

C. W. Churchill, the local confectioner, received a large shipment of Cracker Jack from Rueckheim Bros. & Eckstein of Chicago this week in a remarkable short time. The goods left Chicago via the Santa Fe freight on June 29, and were delivered July 6. Mr. Nichols, agent of the Santa Fe, says this is the regular time made between the two points. Mr. Eckstein, of the Chicago firm, has an orange grove here and is the father of Mrs. L. S. Baldwin.

Pine watch repairing, guaranteed at Palls, the jeweler. Other repair work promptly done.

M. Whitmoyer, Ivan McLaren, George B. Jones, Phil Damon, Mr. Rae, Lance Lewis and Kenneth Hansen made a moonlight trip to the top of Camp Baldy Friday night and saw the sun come up, and never did the sun's rays feel so good, for the cold winds were blowing across the mountain peaks. The boys state that climbing to the mountain peaks is rather strenuous and they don't care to do that very often.

Uncle L. D. Allen is on his way East and a general summer outing. He will go as far east as Eureka Springs, Kansas.

Messrs. Wilding, Moeller, Crabb, Sikes, Brest, Dowse, Tufford, Eymann and LeBaron, all members of the Upland team, and W. C. Cline enjoyed a trip to Venice and Los Angeles last Sunday. At Venice they attended the ball game and dined in Los Angeles.

H. S. Campbell, of Campbell's ready-to-wear shop, states that his July clearance sale is going far ahead of anything he expected and is the biggest success as a sale of any he has ever held in Upland. According to Mr. Campbell's statement, several advertising helped do the work and the people are finding the bargains offered just as advertised.

Mr. and Mrs. E. K. Brown are spending a week's vacation at Eagle Rock, Los Angeles county.

Mr. and Mrs. Chad Francisco and children spent the Fourth at Venice, taking Mrs. Tom Bryden and daughter home.

Mrs. Gresham, Miss Edith and Maud Monroe were visitors at Long Beach from Saturday to Sunday evening.

Miss Ruth Griffith and friends of Cucamonga are enjoying a two weeks' trip at Bear Valley.

Luther Lee was here over the Fourth and Sunday from Compton visiting with friends and relatives. Mr. and Mrs. Charles Edleblute passed a pleasant Fourth at Glendale with friends, remaining over until Sunday evening.

5c—Cracker Jack—5c. Churchill's. Howard Collins enjoyed a quiet and sane Fourth at Cucamonga Canyon.

Mr. and Mrs. J. M. Collins and Mr. and Mrs. G. W. Chatfield of Los Angeles motored to Lytle Creek and passed a pleasant week-end. Fishing was good and a fine haul was made.

Mr. Will Beattie left the first of the week for a six weeks' visit East. He expects to visit in New York, Boston and many other places of interest.

Miss Myrtle Riley visited in Los Angeles Monday.

Mr. and Mrs. Glen Atwood, Miss Fetrov and Floyd Atwood enjoyed the beauties of Camp Baldy the week-end.

J. P. Wedel and family are making preparations to leave for Woodlake to spend the better part of the summer. Mr. Wedel will look after his property interest while there.

Mr. Elton Atwood is enjoying his vacation and is visiting for a few days at the home of Mr. and Mrs. Thompson at Woodlake.

Mr. and Mrs. G. G. Isaac and family visited with friends at Pasadena during the holidays.

Be sure to get a copy of the Saturday Evening Post, and help H. D. Clark get a trip to the World's Championship Game.

Mrs. H. Zweigart and daughter are expected to come to Upland about the 15th of this month and enjoy visiting with Mr. Zweigart for several weeks. The two sons, Adolph and Herman, are visiting at Long Beach for the summer. The family expect to locate here this fall.

A very interesting letter from India appears in this week's issue from the missionaries, Mr. and Mrs. W. H. Smith. Mrs. Smith will be better known as Miss Kate Burkholder.

Miss Bessie and Julia Beattie will leave Sunday for Los Angeles and from there will go to La Jolla for several months' stay.

Delicious orange and pineapple sherbet at Flinn's Chocolate Shop.

Order your ice cream; always have three kinds; gives satisfaction. Flinn's Chocolate Shop.

C. F. Troeller has made a contract with Mr. C. W. Faris of Pomona by which Mr. Faris buys all of his stock and the building before August 15th next. Mr. Troeller has interests in Imperial Valley requiring his attention. For several years Mr. Faris has been a prominent business man at Pomona, where he conducts a large furniture business, and on coming to this city will make important changes in the Troeller store. Mrs. Troeller and the daughters will remain here while Mr. Troeller and the boys will spend the summer on the Imperial ranch.

Mrs. M. J. Roberts expects to leave the latter part of the week for a week's visit with her son at Santa Ana. G. W. Duley's auto truck, seated with thirty, left at 5 o'clock Saturday morning for Long Beach, returning that night. A pleasant time was reported by all going.

Councilman Anderson's family is spending the summer at Huntington Beach. J. F. is spending his Sundays there and looking after business during the week in Upland.

Mrs. J. J. Roberts is doing the transportation act between Upland and the beach in very satisfactory manner. E. P. Fuller was chaperon the other evening when he piloted eight Upland ladies to a joint Rebekeh in station held at China.

C. P. Fuller, J. F. Sawyer, E. P. Fuller and W. E. Westland were among those who attended the banquet tendered to Captain John D. Fredericks at the Hotel Stewart at San Bernardino last Monday evening, making the trip in the C. P. Fuller Hupmobile.

C. P. Fuller, Chas. Ruedy, Earl Paul, A. P. Froehde, J. F. Anderson, G. A. Hansen and M. E. Titus made up a delegation from Upland on Wednesday and conferred with the county road commission on what Upland wanted in the way of highways. The commission took the matter under consideration and a report will be given later.

A. P. Harwood returned Monday from a fishing trip to Kern river, and he states that he never did enjoy such a fishing trip. Several miles of horseback riding was on the program, and although horseback riding is not his main forte, Mr. Harwood believes he stood the trip as well as any of the party. Herbert Williams and a guide accompanied Mr. Harwood.

Creighton & Co. have placed a large attractive light over their sign in front of their building. This gives another attractive light for the city. Much favorable comment has been heard from outsiders as to our well lighted streets and also the electrical signs.

Miss Florence Swan and guest, Miss Murrell Cameron of Berkeley, chaperoned by Miss Kenoth Temple, left Tuesday for Lancaster to visit at the home of Mr. and Mrs. Fletcher Swan.

Big shipment—Cracker Jack—at Churchill's.

Rev. Ayers and wife, former residents of this city, were dinner guests at the home of Mr. and Mrs. J. J. Atwoods Sunday. They were also guests at the home of Mr. and Mrs. Comstock's, on Twenty-fourth street.

Mr. and Mrs. Tom Harris entertained W. C. Reynolds and family and Mr. and Mrs. E. B. Reynolds the Fourth. It is needless to say one good and sane Fourth was much enjoyed, and the hospitality of the host and hostess much appreciated.

Early Monday morning a fire alarm was turned in and the fire department called to the home of Louis Krommeyer to extinguish flames that had reached the kitchen from the cellar. A leaky gas meter was the cause, but what caused the gas to ignite is the unsolved problem. However, not much damage was done.

Mr. Charles Allen visited at Huntington Beach with his family from Friday till Monday.

Mr. and Mrs. Charles Ruedy and Mrs. Aileen enjoyed motoring to Covina the afternoon of the Fourth.

R. F. Lemon and family enjoyed the week-end in Los Angeles. Miss Flora Morley's pleasant smile will be missed for the next fifteen days from the postoffice window, as Miss Morley begins her vacation today.

Mrs. J. M. Brooks and daughter, Mrs. L. O. Bowman attended the Dry Federation meeting at Ganesha park, Pomona, Saturday, and enjoyed hearing some fine speeches, given by prominent men.

Mrs. E. P. Fuller, district deputy of the Rebekeh Assembly, has spent a busy week, as her duties have called her to Claremont, China and Ontario, and next week she will go to Pomona. The local team, composed of Mrs. Hunter, Mrs. Littlewood, Mrs. Cooley, Mrs. E. P. Chaffee, Mrs. Chas. Sikes, Mrs. J. W. Bryden, Mrs. Geo. R. Crane and Mrs. Ed Bowden assist Mrs. Fuller in the initiation work.

An educational talk by Prof. P. J. Wiebe of Grantham, Pa., will be given at the Brethren in Christ church Sunday evening.

Mr. and Mrs. Hyslop and daughter are visiting at Ventura.

Mr. and Mrs. G. H. Clem motored to Venice Friday and Saturday Mr. and Mrs. Tom Redman joined them and they had a very pleasant vacation over Sunday.

Cracker Jack is a winner. Churchill's.

Suppose you had a house dog of which you were proud, not only because he always stuck to you, but because he kept the cats and mice away from your house. Then suppose the dog got along in a grocery store a cat showed up on the horizon. His old-time antagonism to cats immediately rose within him, and Mr. Cat's antagonism to Mr. Dog rose about the same time and the fight was on. All this happened to the pet dog of Rev. George E. Swan and the cat that loafs about the Johnson & Brown store. Result—the cat whipped the dog.

Miss Winnifred Moore left Tuesday for a long visit with her brother and family in Portland, Ore. She traveled in company with Mrs. C. E. Gansby, who goes to Ontario, Canada, for the summer.

Batmore Cracker Jack, Churchill's. If you should go to the band concert tonight and get a nice comfortable seat, just thank the Upland businessmen and A. H. Johnson in particular, for at the last meeting Councilman Johnson was appointed a committee of one to see to it that those seats were built. Therefore the deed is done.

Iowans all over Southern California are already looking forward to the annual summer outing which will be held at Long Beach in beautiful Bixby park, Saturday, August 8, 1914. All who ever lived in Iowa are invited and at least 25,000 are expected. All may count on a good time and will meet many old friends. More information will be given later and you can write for information to Secretary C. H. Parsons, 953 West Seventh street, Los Angeles. Iowans are asked to go with a good dinner, spend the day and have a real jolly picnic reunion.

The term installation of the Odd Fellows' Lodge was held Tuesday night, at which a Pomona team, under the direction of District Deputy Grand Master J. U. Craig, installed the following officers: Harry Plum, Noble Grand; J. F. Anderson, Vice-Grand; H. O. Blohm, Secretary; Geo. R. Crane, Treasurer. The regular appointive offices of the lodge were filled by the chair.

Born, July 9th, to Mr. and Mrs. Fred M. Allen, a daughter.

Miss Nora Kilgore left on Tuesday of this week for a few weeks' visit with friends in Redlands.

How about Cracker Jack? Churchill's.

Mr. E. Spera and two daughters and Harry Plum visited the beaches Saturday. This was the first sight of the big Pacific ocean for the Misses Spera and they were loth to leave it. Mr. Ralph Hamer passed the recent holiday at the beaches.

Landon Huxtable of Strathmore is visiting relatives in Upland this week. Mr. James Black and family are at Ventura for a few weeks.

Miss Edith Hanson is enjoying an outing at Newport Beach.

W. W. Wilkins and family moved this week to Pasadena.

Don't forget to get a Post at Clark's. Every sale helps. H. D.'s average in the race.

UPLAND TEAM IS AGAIN VICTORIOUS

(Continued from Page 1)

center; both men scoring on Bun Craig's rattling two-bagger to deep left center; Craig was out, G. Thorpe to F. Thorpe; Harms' hit to Freeman was too hot for Roy to handle, Dutch getting credit for a safety and immediately stole second; C. Riggs popped to short and W. Riggs dittoed to second.

Cucamonga was unable to make any headway against Riggs' clever twirling and Upland's fine defense until the ninth. Cherbak was thrown out Manker to Swan; F. Thorpe was hit by a pitched ball, and scored on Freeman's double to left; Minor was injected as a pinch-hitter, but went the usual way of said pinchers and fanned; W. Kinkaid ended the struggle by flying out to Bryden.

Upland plays a return game with Cucamonga next Saturday, but owing to the poor condition of their grounds, the game was transferred to Upland and the game will be played on the local's grounds next Saturday. With their present line-up the visitors will make Upland hustle to cop and those attending are assured of a fast battle.

"Too Previous," Eh, Bill?

Miss Opal Werts and Miss Lora Pung wish to announce their engagement to their friends through the Telephone. Miss Opal Werts to William Davidson, and Miss Lora Pung to Floyd Werts. The four are well known in this city.

William Davidson, asks a correction of the report that he is engaged to Miss Opal Werts, daughter of Mr. and Mrs. William Werts. He states emphatically that no such engagement exists and that there is no ground for such a report—Bloomington, Ind., Telephone.

The Niagara Falls mediators will take no vacation. Apparently they are satisfied with just eating good hotel grub and hearing the roar of the cataract between discussions.

About the most hazardous occupation nowadays, next to owning and operating an auto, is being a European high muck-a-muck trying to dodge an assassin's bullets.

Oh, well, considering the hot weather, you can't blame the A. B. C. mediators for stringing it out at Niagara Falls as long as possible.

For Be'ry Jam

Stem, wash and drain carefully berries to be used. One variety alone or different ones blended. Crush with wire potato masher until hard centers are soft, then measure carefully and put in as many cups of sugar as you have of berries. Stir until sugar is dissolved. Can in cold jars and put away in a cool, dark cupboard. The color and flavor will be retained and the jam is delicious for shortcake in the winter months. Also very nice to use in fruit punch.—Mrs. R. S. J.

Algernon—I say, Bessie, do you think your father could give me a position of standing in his place?

Bessie—He could give you the position of standing at the door and opening it for the customers.

The Annual Bother

REPORT OF CONDITION

Of the Citizens Savings Bank, at Upland,
California, as of the close of business
on the 30th day of June, 1914.

RESOURCES.

Loans and Discounts	\$98,540.00
Overdrafts	6,050.00
Safe Deposits, Vaults	1,247.00
Due from Reserve Banks	8,980.76
Actual Cash on Hand	1,824.34
Checks and other Cash Items	109.20
Total	\$116,751.30

LIABILITIES.

Capital Stock paid in	\$25,000.00
Surplus	5,500.00
Undivided Profits, Less Expenses and Taxes paid	8.00
Bills Payable (including Certifi- cates of Deposit representing money borrowed)	5,000.00
Dividends Unpaid	1,000.00
Savings Deposits	58,400.73
Time Certificates of Deposit	16,728.48
State, County and Municipal De- bts	5,000.00
Other Liabilities	54.00
Total	\$116,751.30

State of California, County of San Bernar-
dino, ss.

R. F. LEMON, President, and R. C. Nor-
ton, Secretary (Cashier) of the Citizens
Savings Bank, being duly sworn, each for
himself, says he has a personal knowledge
of the matters contained in the foregoing
report of condition and that every alle-
gation, statement, matter and thing there-
in contained, is true to the best of his
knowledge and belief.

R. F. LEMON,
President.

R. C. NORTON,
Secretary (Cashier).

Subscribed and sworn to before me
this 8th day of July, 1914.

CHAS. P. FULLER,
Notary Public in and for said County of
San Bernardino, State of California.

FRUIT CONDITIONS BY COMMISSIONER A. J. COOK

Agriculture, or the cultivation of
the soil for the purpose of plant
production, requires four things—a
suitable soil, warmth, sunshine and
water. California hands over to the
rancher a rich abundance of warmth
and sunshine. No country in the
world is more generous in this re-
spect than is our own state. In
many sections we have abundance of
water, and as we supply this by
means of irrigation, we have it in
quantity and at times to suit our
needs and convenience.

No other state can produce such a
varied collection of fruits, ranging
from the apple and cherry of Can-
ada to the lemon, orange and avo-
cado of the subtropical regions of
the earth. Not only is this variety
possible, but each fruit of its kind
is the equal of that grown in any
region or climate. This latter is not
always recognized, and is often de-
nied.

The man from Michigan says:
"You ought to have some apples from
the orchards of Michigan!" and adds,
"California doesn't count when it
comes to apples." Yet the writer is
a thoroughly loyal Michigander and
he never ate better apples than those
from the mountain valleys of
California.

Italy cannot compete with the
oranges and lemons of our favored
state. Warmth and sunshine are
what develop the sugar and flavor of
all kinds of fruit, and for warmth
and sunshine, California knows no
superior. Even warmth and sun-
shine are not enough. Brains, push
and vigilance are absolute essen-
tials in the orchard. California
abounds in all these requisites.

One of the chief delights of the
orchardist of California is the char-
acter of his associates. He be-
comes at once one of a great frater-
nity of men, and I must add, suc-
cessful fruit growers are women,
who are unsurpassed in acumen and
brain power by those of any other
business or profession.

It is a great asset in any busi-
ness to have associates, rivals if
you please, who are mental dynamos.
Nothing will inspire a man to his
best effort, like competitors of the
highest ability. That our orchard-
ists are abreast the best intelligence
of the day, is plainly evinced in the
fact that they have, unaided, ini-
tiated and developed such co-opera-
tions as the Fruit Growers' Supply
company, the California Fruit Grow-
ers' exchange and the Citrus Pro-
tective league.

Our fruits may be classed as
citrus and deciduous. For con-
venience, I will group with the for-
mer other than citrus that are nonde-
ciduous, such as olives, avocados,
mangos and other less known sub-
tropical fruits.

Total Receipts \$100,000,000

Citrus fruits have been hitherto
grown much more in Southern Califor-
nia than in Northern California,
though there are indications that
this may not be true in the near
future. This prophecy is sustained
by the following figures, which are
interesting and significant for other
reasons:

Acres of lemons, bearing trees,
north of the Tehachapi, 778; non-
bearing, 583; total north, 1361. Acres
bearing south, 17,324; non-bearing,
13,868; or a total acreage of lemons
in the state of 32,556. The acreage
of bearing orange trees north is 13,
304; of non-bearing, 32,990; making
a total of 46,294. Of bearing orange
trees, south, there are 91,234 acres,
non-bearing, 21,362, which gives a
total of 112,597, making an aggregate
acreage of orange trees in the
state of 158,891. This gives a grand
total of 191,357 acres of citrus or-
chards in the state. It has been
estimated that in the banner fruit
year of our state nearly or quite
\$100,000,000 have been received from
fruit, including walnuts and almonds,
both of which are profitably and suc-
cessfully grown in California, and of
this nearly one-half has come from
the citrus orchards. I well remem-
ber when we shipped 20,000 carloads
of oranges and lemons, that many
advised that we were planting seeds
and had reached the highest possi-
bility in the marketing end of the business.

With our production of double the
number of carloads, we have a bet-
ter market than we had then. This
is doubtless due in great part to the
thorough organization of our citrus
growers. All phases of orchard prac-
tice are now conducted in a superb
fashion. Insect and fungus diseases
are met and controlled, fertilization
and cover-cropping are not neglected,
irrigation is timely and generous, cul-
tivation is of the best, care in pick-
ing and handling has often reduced
decay to a negligible quantity, while
the marketing is carried on in a
scientific manner that is seldom sur-
passed in the best managed man-
ufactories. Even nature is met and
vanquished, as Jack Frost is no
longer dreaded by our most enter-
prising growers.

We need only add that today Califor-
nia leads the world in the excel-
lence of its citrus fruit, and in the
skill of its orchard management. We
now produce 200 carloads of fruit
per acre. It behooves every grower to
be satisfied with nothing less than
the highest excellence in all his or-
chard methods and practice.

Only one thing needs to be empha-
sized: Some of our growers are so
unwise and inconsiderate as to mar-
ket unripe fruit. This practice not
only hurts the few that practice it,
but all in the business. The very

folly of it must soon call a dead
halt on all such shipments. Any
contemplating citrus culture must
locate only where climate and abun-
dant water will guarantee success,
when harnessed with brains and en-
ergy.

Olives are successfully grown both
north and south. The excellence of
olive oil and ripe pickled olives in-
sures a rapidly increasing market for
this nutritious fruit. While less
profitable than citrus culture, it is
yet a good money getter, and re-
quires less care and labor.

Grown North, South

As far north as Tehama and Shasta
counties, and away to the south
in Riverside and San Diego counties,
olive growing gives good returns to
the orchardist. The Mission variety
is the most popular, though the larger
olives have their advocates. The free-
dom of the olive from pests and the
exceeding beauty of the trees, as well
as the great longevity of the olive,
argues for its receiving greatly in-
creased attention from prospective
orchardists.

The avocado is a favorite fruit
with many, has been produced at a
fabulous profit by a few, and bids
fair to become a prominent product
of the California fruit grower. Some
well-informed growers believe that
it will in time rival the orange in
value and popularity. The plantings
are increasing rapidly, and if suc-
cess continues to warrant the warm
endorsement of its friends, we shall
soon have large plantings of these al-
liator pears. Mangos, loquats, guava,
figs and dates and a few other less
important sub-tropical fruits are a
substantial asset to California and
are a real comfort in the home
equipment.

Deciduous fruits are a very im-
portant resource in California. They
are less remunerative than are the
citrus and also less exacting in their
demands. Pears, prunes and apri-
cots in exceptional cases may bring
a return of \$500 or \$600 per acre,
and cherries even more. Most of
these have a double vantage, as they
not only are in demand as a green
crop, but are much prized for can-
ning and as dried fruit.

Cherries in Big Demand

Cherries are especially fine and do
exceptionally well in the great Sa-
joquin and Sacramento valleys. I
have a friend on the Sacramento
river who has a few cherry trees
along his levee, and he has sold the
crop for more than \$3000. He has
often shipped the first box to New
York and one year received for the
first box \$100, and for the next three
\$25 each. The cherries do excellently
well in all the mountain valley severe
favorite varieties are the Lambert,
Bing and Black Tartarian of the
reds, and the Napoleon (Royal Anne)
of the light varieties. The black
are fine as pollinizers. Pollination
Tartarian and the black Republican
and mixing varieties must be sharply
looked after in growing all varieties
of deciduous fruits.

Pears are a great success in all
sections of California. They are very
profitable, the Bartlett being the fa-
vorite. Blight is the one serious trou-
ble, but it can be controlled by severe
pruning cutting out, which pays a
great profit, even though arduous.
Four counties, Sacramento, Solano,
Santa Clara and Placer, grow over
100,000 trees each, the first two over
200,000, while Sacramento leads with
220,000.

Millions of Peach Trees

The peach is also grown in per-
fection in nearly every part of the state.
For size, flavor and beauty California
peaches know no superior. Elberta,
Crawford, Salway and Golden cling
are a few of the many excellent var-
ieties grown in the state.

Several counties have hundreds of
thousands of bearing trees, while
Fresno leads with three and a quarter
millions of peach trees.

The prune industry of California
ranks first in the world. The dried
product finds a ready market in all
countries, over one-half of the world's
product being grown in California.
Our prunes are preferred to all others
in the markets of the world. Ten
tons are often produced to the acre.
The cash returns of a single crop has
reached \$10,000,000. All parts of the
state are enriched with prune orch-
ards. Many counties have upwards
of 100,000 trees, while Santa Clara
county leads with the enormous total
of 5,357,990 trees. The plum grows
exceptionally well in all parts of the
state and finds a ready and eager
market in all sections of the east.
Many counties have thousands of
bearing trees. Santa Clara and Placer
counties showing orchards of over
200,000.

The apricot is one of the most
prized fruits of our state. Canned
and dried apricots are alike much
sought after in all the markets of the
world. Six hundred dollars is some-
times received from a single acre of
apricots. Several counties grow "cots,"
by the hundreds of thousands of
trees, while Santa Clara leads with
upwards of a half million of bearing
trees.

Apples of very superior quality are
grown in almost all of the high al-
titude valleys of the state. Two coun-
ties have a large acreage, Santa Cruz
and Sonoma. The first upward of a
half million trees and the latter fully
half as many. I have never seen
finer apples, of such superior vari-
eties as Spitzenburg, Jonathan, Ortley
and Rome beauty, which I have sam-
pled from the elevated valleys of the
mountains, even from Siskiyou coun-
ty away south to Julian in San Diego
county. I believe that the day is not
far distant when the mountain apples
of California will have a reputation
equal to that of the Washington navel
orange.

The vineyards of California are
very extensive and grapes are put to
varied uses. Both foreign and Amer-
ican varieties do exceedingly well.
There are large plantings both north
and south. The crop of last season
sold for the enormous sum of \$26,
000,000. Fresno, Napa, Sonoma, Sac-

MINIMUM ESSENTIALS

After reading the article in last
week's News on the subject of Mini-
mum Essentials, a (supposedly) new
method of teaching children, it has
occurred to some of us that the peo-
ple who read the News might be in-
terested in knowing what their own
school has been doing to keep in
touch with up-to-date methods.

We school people like to keep up
with the times, even though we do
not talk about our doings to our
great extent. Therefore we want to
say that soon after the Minimum Es-
sentials man advertised his wares at
Institute last winter, two of our
teachers went to Monrovia to inves-
tigate the new system and to see if
we cared to introduce it in our own
schools to any great extent.

We had a pleasant visit, and Mr.
Thompson very kindly gave us speci-
men sheets to carry home after tak-
ing us to several schools where the
method was being used.

It is not an entirely new method,
however, as a number of us can tes-
tify from our own experience. But
it is new in respects to the expense
and the plan of doing away with all
other text books.

When we came home we were eager
to buy the material and begin cer-
tain of the drills at once. But after
most carefully considering the mat-
ter, we decided not to spend the
public's money until more prosperous
times came to our community.

BIG SURPRISE TO MANY

IN UPLAND
Local people are surprised at the QUICK results received from simple buckthorn bark, glycerine, etc., as mixed in Adler-ika, the German remedy which became famous by curing appendicitis. Mac the Medicine Man states that this simple remedy draws off such a surprising amount of old foul matter from the bowels that a SINGLE DOSE relieves sour stomach, gas on the stomach and constipation INSTANTLY.

\$100 REWARD, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Address: F. J. CHENEY & CO., Toledo, O.
Sold by all druggists, 75c.
Take Hall's Family Pills for constipation.

UPLAND LODGE 419 F. & A. M.

Meets the first Monday evening of each month at 7:30 P. M. in I. O. O. F. Hall. All visiting Brothers invited.
F. C. Froehde, W. M.
George P. Smith, Secretary

SEE**G. W. DULEY**

if in need of stable Fertilizer, agent for PIONEER FERTILIZER CO. OF LOS ANGELES; will take orders to deliver on groves. Also direct agent for Swift & Co.'s High Grade Commercial Fertilizer, guaranteed analysis. Have sold 250 tons Swift's Fertilizer already this season. Phone 23-L, Upland.

YOUNG'S SHOE STORE

is now located in the Kuehny building, first door north of The News office. Our line of Men's Work and Dress Shoes is complete. Shoe repairing a specialty.—J. G. YOUNG.

UPLAND TRANSFER CO.

W. E. Allen, Proprietor
General Transfer Work and Heavy and Light Hauling. Prompt Attention. Phone your Orders to Neff's Livery Barn (Phone 124-R) during the day. After 6 p. m. call up Main 109-Y.

BLOODHOUNDS BRED IN KANSAS WILDS

Out on the prairie near Fredonia, Kas., Max Kenney, fancier, has one of the very few bloodhound farms in the United States. Max Kenney was a lover of dogs, horses and fine blooded animals of all kinds, but it was the abundance of shale and gas near Fredonia that led him to embark in the bloodhound business, says the New York Sun.

The shale and gas made brick manufacturing profitable. Mr. Kenney's brick company turned a lot of surplus heat to account by taking up chicken incubation. To combat the depredations of chicken thieves Kenney purchased a pair of bloodhounds. The reputation of these dogs for tracking thieves and petty criminals in the vicinity of Fredonia soon grew until the animals were in frequent demand by the sheriff. The possibilities of the bloodhound business became apparent.

The enterprise has been a profitable one. Bloodhounds have been sold to officers and criminal trackers in almost every State in the Union, as well as Canada and Mexico. Among his customers was the wife of Francisco Madero, former President of Mexico, who purchased a pair of puppies, Sherlock and Ubelia, and presented them to the chief of police of the City of Mexico about two years ago.

A visit to a genuine bloodhound farm is apt to shatter a lot of cherished traditions. For one thing, the bloodhound is not the great, bulky monster that chases Eliza across the stage in "Uncle Tom's Cabin." Usually Great Danes or Newfoundlands are chosen by the showmen. Superficially the bloodhound resembles the old-time foxhound more than any other breed of dog. He is generally tan or black and tan, has a thick-set body supported on stout, short legs, a head that inclines to droopiness and long, floppy ears.

The bloodhound is marked by a heavy dewlap and his skin looks as though made for a larger dog. When his head is lowered the skin rolls in heavy wrinkles on his forehead and the weight of the ears helps to pull it down until it looks as if it might drop over his eyes and blindfold him. The head is really the important part, from the fancier's standpoint, nearly one-third of the points that go to make the ideal bloodhound being on the configuration of the part in front of the shoulders.

The length of the ears is an important feature and some of the animals in Mr. Kenney's pens look like caricatures, the ears are so long. Old "Le Seigneur Du Manor"—"Lord of the Manor," in plain English, the patriarch of the kennel, had ears thirty-one inches from tip to tip, and puppies four months old sport auricular appendages that measure from twenty-five to twenty-seven inches. Lord of the Manor weighs 160 pounds and was imported from England.

Hecuba of Randage is a typical female dog and is the mother of several litters of puppies that are now making good on the trails of criminals or are in the school of preparation that Mr. Kenney conducts in connection with his farm. At present there are about a dozen imported dogs in the different kennels, and with them forty or fifty of their native-born descendants, ranging in age from pups a few weeks old to mature, trained dogs.

Some of the dogs are trained by Mr. Kenney himself, though he advises buyers of young dogs to do their own training. The ready trained dogs are kept mostly to be sent out on calls from officers in different parts of the country, though frequently purchasers insist that they be supplied with pups already trained. Training a pup is a simple matter, because they take to a man's trail as naturally as a shepherd dog to the heels of a cow.

BLOODHOUNDS BRED IN KANSAS WILDS

"Bloodhounds" sounds worse than the wearer of the name really appears. The chief difference between them and other dogs is that their sense of smell is more acute, and it may be that centuries of man trailing has given them a hereditary penchant for human game. However, they may be trained to hunt wild animals as well as persons and are very servicable as watchdogs and bodyguards. They are noted for discrimination in keeping a particular scent and their intelligence in again picking up a lost trail is remarkable.

When the pup is about two or three months old is the best time to start training. The first runs should be short to keep the little fellows from getting discouraged. Gradually the runs are lengthened and runners occasionally changed, though the same one should be used during any one day's practice, because if more than one trail is made in one day the pup is likely to become confused and fail to stick to the scent.

Changing runners too often is apt to spoil the dog, and an animal trained in this way might be likely to leave the trail of a criminal and follow some one else. These dogs are no more inclined to be cross than any other breed unless taught it. Some handlers of dogs teach them to be vicious and fight at them with hats or handkerchiefs. This mode of teasing will make the puppies cross, and after they are grown woe to the evil-doer if they should get a chance at him.

The State would probably be saved the expense of a trial. Some dogs bark on trail, while others do not. Some handlers prefer the silent kind, especially for night work on leashes, when the chances are good for making a capture by stealth. However, most of the work of bloodhounds is done on trails anywhere from a few hours to several days old, with the dogs far in advance of the handler, so the habit of "giving tongue" while on trail is very desirable in helping the dogs to make their location known. The reputation of the English bloodhound as a cold trailer is what makes him so valuable.

The term "English bloodhound" is misleading and improper, according to Mr. Kenney, who says there is really but one bloodhound, and that is the breed that originated in England. No other so-called bloodhound is eligible to registration in the bloodhound class. Beagles are sometimes used to trail human beings, and in slavery times foxhounds were taught to chase escaped Negroes. Even a cur will follow the trail of his master, but the point in which the real bloodhound excels all others is his acute sense of smell and his resourcefulness in picking up a trail when once thrown off the scent.

"It seems to be their nature to depend on their sense of smell," remarked the proprietor of the dog ranch as we stood watching half a dozen pups a few weeks old, tumbling over each other in true puppy fashion. "If I go near them they try to follow me, just like any other pup. But they don't depend on sight very long. Let me get a few feet away and instead of keeping their eyes on me, down go their little noses on the ground and they keep coming, with nothing but their sense of smell to guide them. I've tried to slip up on the outside of a building when they were sleeping but they would awake, sniff the air and go poking their noses around cracks and knot holes till they would have me located."

"The sense of smell in a trained dog is so acute that it is beyond human comprehension," he continued. "Often they get a sniff of the weeds or grass or other objects that the runner happens to rub against. If the wind is blowing across the trail the dog will stay on the leeward side. Sometimes they run as much as twelve feet from the trail on the side from the wind. I have noticed this so often when trailing in snow. This shows that they do not depend on sight to help them, for if they did, they would be guided by the tracks."

Mr. Kenney feeds his dogs on meat scraps, bread and foods such as any other dog would relish. During the hot weather of the summer just past it wasn't so much their eating as their drinking that concerned him. All the wells on the farm and in the neighborhood went dry and he had to haul six barrels of water a day for a long distance to quench the thirst of those dogs.

ANCIENT EGYPTIAN METAL

In a paper read at the recent meeting of the British Institute of Metals in Ghent, Belgium, the writer described his investigations into the crystal structure of Egyptian metal objects, all more than 2000 years old, made either of bronze or copper.

An interesting photograph reproduced in the paper is of a roman coin which still shows cores.

The writer described the case of a bronze knife 3500 years old, in which the original cord structure has endured until the present day and is still perfectly stable at atmospheric temperatures. The view is held that the knife was hammered cold and so the best cutting edge was obtained. The crystal grains are very small, there having been apparently no crystal growth during the ages that have passed since the metal was first worked. This shows either that recrystallization does not take place at ordinary temperatures or, if it does, then many times 3500 years is required to effect the change.—Engineering.

A Philadelphia doctor believes that bad boys may be turned into good ones by operations on their heads. But there are boys with heads which contain nothing upon which to operate.

BUILDING A MOTOR SPEEDWAY

After returning from Indianapolis, Young did a little work on the Los Angeles speedway idea, but found at that time that conditions were not ripe for such a project. About two months ago activity in the direction of a local speedway were renewed, however.

George F. Bental of the Mercer-Simplex agency returned from the last Indianapolis race much enthused over the prospects for a motor race course here. Bental has admitted that he is interested in a proposition to build a great speedway here. It is hoped that the track will be completed by next spring so that a great international race meet may be held here during the exposition season.

While at Indianapolis last May, Bental discussed the speedway proposition with foreign drivers and they told him that they would be anxious to compete on the Los Angeles course.

A speedway here, the size of that at Indianapolis, would undoubtedly attract every great American and foreign driver to Southern California. There is just one way to make a success of a speedway classic, according to both Young and Bental. To attempt to have a number of these automobiles each season, would cheapen the sport and make a failure of the speedway project. It takes money to draw the class in racing circles. A purse of \$25,000 would attract the big men of the racing game and with the great event being staged but once a year, there should be a growing interest aroused.

Not less than \$200,000 would be required to build this race track. It would be a great advertising feature for Los Angeles and Southern California. The annual Los Angeles sweepstakes could be held here in mid-winter at a time when in no other part of the country conditions would be so favorable.

Southern California has always led the United States in automobile racing. Many of the world's greatest drivers have been developed here like school boys; but to hold this place in motor racing, Los Angeles must have a speedway.

Fred Harlow has suggested a plan for raising the money to build the speedway by subscription. Plans with buttons like those adopted with success by the various highway associations throughout the country.

After the speedway was built it is Harlow's plan to turn it over to the city as a committee of local automobile men to be appointed to run the Los Angeles sweepstakes race each year.

DEER HORNS FOR MEDICINE

China wants deer, reindeer and wild-sheep horns, which are used in Chinese medicine, and United States Consul George E. Anderson, writing from Hongkong, says that city, as the chief center of trade in Chinese medicines in South China, imports a considerable quantity of such goods annually.

Prices realized for such goods in prime condition, Mr. Anderson says, are high. At present the chief source of supply of reindeer horns is Siberia, the horns being obtained in the Far North, brought to the seaboard by rail, and imported into Hongkong through Vladivostok. "Supplies of stag horns," continues Mr. Anderson, "are from the mountain districts of West China, particularly in Szechwan and Yun-nan provinces, and from Southeast Siberia. There is also a considerable import of wild-sheep horns from the mountains of India and Tibet and from the mountain frontiers of Indo-China, Siam and the Malay states."

"Apparently there is no reason why reindeer horns from Alaska and stag horns from other American territory should not be brought into this trade. The first requirement in all such goods is that they shall be in prime condition for Chinese purposes. The horns are used in the manufacture of pills and other medicines, and, as is usually the case with Chinese medicines, other elements than actual medicine qualities enter into their valuation."

"Horns must be shipped entire, must be without scar or blemish, and with the hair or growth on them. They must be shipped in the dry state free from salt and other preservative. They should be shipped in sealed cases in the winter months, the trade here running from November to March. If the skull can be shipped intact with the horns, the latter will be valued at something like 20 per cent additional to the normal price. Horns at present imported range from \$9 to \$14 local currency, or \$4.30 to \$5.70 gold per pound. Reindeer horns weigh two to ten pounds, and are usually shipped in cases with thirty to forty pairs of horns to the case.

"Stag horns are highly esteemed and at times command very high prices, some extra fine specimens for Chinese use recently bringing as high as \$9 gold per ounce. To command any such prices, however, the horns must be in prime condition from the Chinese standpoint. These stag horns weigh four to fifteen pounds. Wild-sheep horns in prime condition bring something like \$3.60 to \$5.75 gold per ounce.

"All these horns are ground into powder and mixed with other ingredients to form a sort of pill tonic—'strengthening pills,' as the Chinese term them, and are used largely by old people and people in debilitated condition. Some of the large medicine factories in China maintain herds of deer for their horns."—Consular Reports.

Studebaker

He—Did she mention their husband's pockets.

Famous Last Lines

"The origin of the fire is unknown."—Chicago Tribune.
Um, yes! Also, "No arrests."—New York Telegram.
Also, "Suspicion points toward certain persons."

Cucamonga

Vincent Roth and Henry L. Albert spent the 4th and 5th at Venice.

F. A. Lucas visited San Francisco for a couple of days last week.

Rev. Frederick Miller has been given a vacation of two weeks and he and Mrs. Miller will spend it at Los Angeles and the beach.

The Old Settlers Water Company still has possession of the division box on Hellman avenue and are using the 32 inches of water that the company claims ownership. The Cucamonga Water Company has made no effort to wrest the box from the possession of the caretakers, and possibly the matter will be settled by the lawyers who are now considering the merits of the controversy.

Captain J. D. Fredericks, candidate for the Republican nomination for governor, was here Monday afternoon and made a short speech at the corners to a number of our people who had gathered there to see him. He made a very good impression and will receive good support at this place.

The Pacific Electric railway celebration at San Bernardino Saturday will attract many people from this locality. The Citizens' league of Alta Loma will provide badges for all from this point, and as the silver spike was presented by Alta Loma and an address is to be made by Captain P. A. Demens, our people consider that Alta Loma plays an important part in the celebration.

The trustees of the Cucamonga Storm Water Protection district met Tuesday and organized by electing J. H. Kusanman president; J. H. Rupp vice-president, and W. C. Belden clerk of the district. An inspection was made of the ditch on Hellman avenue and it was decided to begin at once the preliminary work of getting things in shape for repairing the drain. It is estimated that the work will cost \$5,000.

For Cleaning Everything

Into two quarts of water slice a 5-cent bar of any good white laundry soap and set over the fire to dissolve. Just before removing it from the blaze add 10 cents' worth of salts of tartar. This makes a soft soap that will clean anything from the floors to your finest wool suit. It is an excellent thing to clean bathroom fixtures and sinks with, as it never scratches the surface. It should be thinned with hot water before using.

Two Failures

"Is it true that both your husband and the man who lives next door to you have failed in business?"
"Yes, but Ned's failure isn't nearly so bad as Mr. Naybor's. He failed for 50 cents on the dollar, while my husband failed for only 10 cents on the dollar."

A Time Saver

A good way to save time when you are sewing by hand and come to a thick seam is to run the point of the needle through your hair, which will cause it to pass through the goods freely and save the time of threading a finer needle.

Add Bouquet to Salad

Do not throw away vinegar in which home-made pickles have been preserved. Keep it for use in salad dressings instead of the ordinary vinegar, as the flavor is delicious and one that cannot be obtained in any other way.

Why Not?

If Senator Poindeux of Washington wants Dr. Cook to have a \$300 gold medal as a reward for the doctor's discovery of the North Pole, why doesn't he pay for it himself?—Boston Globe.

At a Loss

Wife of His Bosom (in course of domestic difference) — Coward: Brute! Ruffian! Pig! Monster! Beast! Oh, I wish you knew what I thought of you.

A Light Withheld

It would be illuminating to know just what Villa says instead of what his press agent says he says.—Philadelphia Ledger.

Farmer Greene—Nothing is sure but death and taxes!
Farmer Brown—Except that the taxes will be more than they oughter

Brass Polish

For polishing brass inkstands, vases, match cases or faucets, apply cigar ashes with a damp cloth and polish thoroughly. The articles will look as good as new.

Mr. Gempop—Fireman, before you turn the hose on my burning domicile can you assure me the water you use is free from bacteria?

The Thin Man—Do you think we will have a war?

The Fat Man—Now. Before the season is over the Federal league will join organized baseball.

Silas—Them two trout fishermen over there eating limburger sandwiches and drinking whisky is college professors!

Hiram—It beats all! Them cusses seem to be getting more civilized every year!

SAN BERNARDINO'S BIG CELEBRATION

(Continued from Page 1)

of the New York Motion Picture company—will be there. Cowboys and Indians and soldiers will ride horesback.

To Sell Tickets Again

More than twenty years ago Paul Shoup, a San Bernardino-reared boy, started his railroad career selling tickets for the old motor line to Redlands and Riverside in a crude depot in that city. The Riverside line was then a part of the Southern Pacific, but the Redlands branch was owned by a private corporation, which later transferred its interests. Shoup impressed company officials with his natural abilities at once and after being stationed at San Jose, Portland and other places he was elevated rapidly to the presidency of the Pacific Electric system.

MAYOR H. H. ROSE OF LOS ANGELES.

Now President Shoup, on the formal opening of the system's greatest extension, will play an important part in its official celebration on Saturday, and in the parade, which will represent the trend of improvements of transportation facilities he will be seen seated in a replica of that old motor station in the same old uniform and cap, selling tickets and collecting the shekels for the company. The float on which President Shoup will play this unique role will occupy the most important part in the great parade.

The old-time attachments for the city of his birth and the scenes of his boyhood still hold a fascinating grip upon the official, and it will probably be with no little pride that he will act in his humble capacity

throw out the clutch. Machine making slowest time takes first prize. Prizes: \$15 electric stand lamp, donated by C. M. Hanf; second, \$7 shoes, donated by C. A. Watkins; third, \$5 in trade, donated by C. A. Watkins; fourth, \$5 in trade, donated by Lee Beam; fifth box of cigars, donated by Hott & Winkelman.

AT URBITA SPRINGS

Event One
2:30 p. m. Greased pole. Prize \$3 hat, donated by Wolff & Grossman.

Event Two
Three legged race—First prize, \$2 shirt, donated by Hub Clothing Co.

THREE-CAR TRAIN NOW IN OPERATION.

Saturday. And San Bernardino will rejoice that one of its boys is now the directing head of a system which finds its way back linking it with Los Angeles and other inland cities with bands of steel.

Old Cars and New

Then will come the old street cars and finally the newest electric trains in which the guests from other cities will ride.

Major O. P. Sloat is named as master of ceremonies. The pageant will end at Lugo Park, where the speeches and ceremonies of the "get-together" will be celebrated. Paul Shoup, a native of San Bernardino, president of the Pacific Electric, J. T. McMillan, general manager will represent the company. John S. McGroarty, Mayor H. H. Rose and Mayor J. W. Catic will make the principal addresses. There will be remarks by other prominent men. R. E. Swing will be chairman of the Lugo Park celebration.

At the Y. M. C. A. the ladies' committee will entertain at lunch about 200 specially invited guests, men of prominence all over Southern California.

An elaborate sports program has been arranged for the celebration in the afternoon which is as follows:

Event One

12:15 Noon, Boys' novelty bicycle race for boys under 18. Course 3rd and D streets to Third and F and return. Entries to ride to Third and F, select costume and ride back to starting place. Prizes, sweater donated by Jonas & Seidner, Boy Scout shoes and medal, donated by Frith's shoe store; baseball glove valued at \$1, donated by the Barnum Stationery company; Spaulding ball bat, donated by LeRoy stationery house.

Event Two

Motorcycle snail race—Ride to Third and D, thence to Third and F and return. Machine making slowest time wins the race. Riders must not touch ground with their feet at any time. Prizes, first, \$7 sweater, donated by Silverwood's; second, \$3 straw hat, donated by R. Ankers; third, pair of goggles, donated by E. C. Peck; fourth box Snyder's cigars, donated by Snyder's cigar store.

Event Three

Six cylinder auto snail race. Course Third and F, thence to Fourth street, east to E and south on E to Third. Rules: Auto drivers must keep machine in high gear and must not

At the Churches

Methodist Church, July 12, 1914

Brethren in Christ

Sunday School, 9:45 a. m.

Preaching, 11:00 a. m.

Young People's meeting 6:30 p. m.

Preaching, 7:30 p. m.

Prayer Meeting, Wednesday evening, 7:30 p. m.

Greek Theater, Claremont.

Commencing next Sunday evening at 5:30 o'clock in the Greek Theatre at Claremont, a series of Sunday evening services is to be held throughout the summer months. Last year these services held in the Greek Theatre proved very popular and people for many miles around Pomona College motored to these services each Sunday evening.

Following will be the speakers for the month of July.

The preacher July 5th will be the Reverend Morris H. Turk, Ph. D., Junior Pastor of the First Congregational Church, Los Angeles. Other preachers for the month of July are: July 12, the Reverend Robert Freeman, D. D., Pastor of the First Presbyterian Church, Pasadena; July 19, the Reverend Arthur S. Phelps, D. D., for sometime Pastor of the Central Baptist Church, Los Angeles; July 26 the Reverend Russell F. Thrapp, Pastor of the First Christian Church, Los Angeles.

Two swelled heads are worse than none.

Affinity—the first man to show up with a solitaire.

Most men who consider themselves big guns are only smooth borer.

A man is never too busy to listen when the lady on the dollar talks.

We all have relatives who would be more satisfactory as strangers.

An ounce of prevention may not be worth a pound of cure, but it costs less.

A poor girl generally has to marry an old man with money or a young man without; her ideal seldom comes to time.

Charlotte Perkins Gilman says that Cupid is a "has been." Far better, Charlotte, to be a "has been" than a "never was."

West Virginia became legally dry today—and some fellows think a Fourth of July celebration without the "funny water" to addle their brain is a mighty poor Fourth.

Aged Bottle of Wine

Bottle of wine left in Philadelphia when the British evacuated that city during the Revolution has been given to a local society and will be drunk in 1992 when the society will celebrate its centennial and the wine will be 214 years old.

J. D. FREDERICKS TALKS TO CITIZENS

(Continued from Page 1)

press into the laws of all notions than has been known, but they (the progressives) have got out a book on their virtues as thick as your foot, but with no more identification than the prints of a milling herd of cattle.

"All men in the legislature now posing as progressives were elected as Republicans. I voted for them, but little did I think they would set up a dynasty of their own."

"The progressives claim credit for woman's suffrage. Hiram Johnson did not open his mouth on this subject, but the Republican legislature put it on the books. Years ago, I gave a woman lawyer a position in my office. I believe if women want the ballot, let them have it."

"They claim credit for the direct primary. In 1907, under a Republican governor, it was presented, and in 1909 was enacted, the only difference between that and the present law being the latter costs more and causes more inconvenience and trouble."

Even Pure Food

"In Pomona, they claimed the pure food law as theirs, but in 1907 that law, under the Republicans, was put on the statutes. The lobby combat-ed then was the worst persistent ever hailed against a California legislature, but we passed it. It sent me into the stores and shops of Los Angeles and showed the people the conditions that existed and convinced them of the need for such a law."

"The child labor law was enacted under Governor Pardee, but Governor Johnson claims it."

"Take the election laws—the Republican party gave California the Australian ballot system in 1903."

This was amended in 1907 and stands practically the same today.

"The domestic relations law—the women and children are protected under this law of 1907, the grandest thing ever done in California. It gives the children a chance."

"The Republican party in 1909 abolished race track gambling."

"For good roads, the Republican party laid all the plans, raised the money and all Johnson had to do was to spend it, and some day I will have something to say of how it has been spent."

"The juvenile court law—that's funny. The governor signed a bill that never passed the legislature. The Progressives do not know what is in the juvenile court laws."

"Now we will get down to this: There is no doubt but that at one time the Republican party had within it a machine that was not run in the people's interest. But we licked it and we licked it ourselves."

"The Southern Pacific had to be put out of the political dominance of this state. The only thing it had that we didn't was the pass privilege. It got them more than money could buy as there was a sort of halo about that little bit of pastebord."

"The death knell of the Southern Pacific as a political factor was rung by the Republican party in 1909, when its legislature passed a law forbidding the use of a pass on railroads. This was before Johnson was heard of and all he has to do since was to perambulate up and down the state and keep the S. P. out after being ousted."

"We give him credit for doing this, but he has built up a machine that's a whole lot worse, in his vast army of office holders that are his henchmen and do his beck and call."

"Whom have you there in tow?"

"This is Rip Van Winkle. He just woke up."

"Why guard him so carefully?"

"Well, we're letting him see the women's styles gradually, don't you know?"

GOOD BREAD

That Means Burkholder's Boston Bakery Bread

We have installed new methods of baking at our Boston Bakery, and we are thus enabled to furnish you with a very Superior Quality Bread, as compared to that made by any of the old-time methods. You will always find
